Plain and simple: until our English learners have equitable access to the curriculum, they'll continue to struggle with subject area content. And if you're relying on add-on's to fit in from your language arts basal or a supplementary program, Mary Soto, David Freeman, and Yvonne Freeman are here to equip you with much more effective, efficient, and engaging strategies for helping your English learners read and write at grade level. One assurance right from the start: Mary, David, and Yvonne are not suggesting you reinvent your curriculum. Instead, Equitable Access for English Learners, Grades K-6, focuses on how to fortify foundational practices already in place. First, you'll learn more about the Equitable Access Approach, then it's time to dive into the book's four units of study. Drawing on each unit's many strategies, you'll discover how to apply them to any unit in your own language arts curriculum and start differentiating: How to draft and implement language objectives to help English learners meet academic content standards How to make instructional input comprehensible, including translanguaging strategies that draw on your students' first languages when you don't know how to speak them How to utilize the characteristics of text to support readers, along with a rubric for determining a text's cultural relevance How to build students' academic content knowledge and develop academic language proficiency Each unit addresses a commonly taught topic in today's language arts programs and comes with ready-to-go review and preview activities, key strategies, grade-level adaptations, reflection exercises, and printable online resources. Taken as a whole, they constitute an all-new approach for providing that equitable and excellent access our English learners so rightfully deserve. "When you adopt our Equitable Access Approach, your students will not only thrive, they'll also find your language arts curriculum much more meaningful and engaging." —Mary Soto, David E. Freeman, and Yvonne S. Freeman *Perspectives on Transitions in Schooling and Instructional Practice* examines student transitions between major levels of schooling, teacher transitions in instructional practice, and the intersection of these two significant themes in education research. Twenty-six leading international experts offer meaningful insights on current pedagogical practices, obstacles to effective transitions, and proven strategies for stakeholders involved in supporting students in transition. The book is divided into four sections, representing the four main transitions in formal schooling: Early Years (Home, Pre-school, and Kindergarten) to Early Elementary (Grades 1-3); Early Elementary to Late Elementary (Grades 4-8); Late Elementary to Secondary (Grades 9-12); and Secondary to Post-Secondary (College and University). A coda draws together over-arching themes from throughout the text to provide recommendations and a visual model that captures their interactions. Combining theoretical approaches with practical examples of school-based initiatives, this book will appeal to those involved in supporting either the student experience (both academically and emotionally) or teacher professional learning and growth. Simple but powerful, Journal Buddies is no ordinary journal. It is an invitation to experience a journaling adventure and to expand creativity and express feelings. It is an opportunity to strengthen self-esteem, build healthy relationships and create a positive outlook on life. It is a unique journal created with the help of important people in life, such as friends, parents, teachers, family members, etc. *Corpus Linguistics for English Teachers: New Tools, Online Resources, and Classroom Activities* describes Corpus Linguistics (CL) and its many relevant, creative, and engaging applications to language teaching and learning for teachers and practitioners in TESOL and ESL/EFL, and graduate students in applied linguistics.

English language teachers, both novice and experienced, can benefit from the list of new tools, sample lessons, and resources as well as the introduction of topics and themes that connect CL constructs to established theories in language teaching and second language acquisition. Key topics discussed include:

- CL and the teaching of English vocabulary, grammar, and spoken-written academic discourse;
- new tools, online resources, and classroom activities;
- and • focus on the "English teacher as a corpus-based researcher."

With ready-to-use teaching vignettes, tips and step-by-step guides, case studies with practitioner interviews, and discussion of corpora and corpus tools, *Corpus Linguistics for English Teachers* is a thoughtfully designed and skillfully executed resource, bridging theory with practice for anyone looking to understand and apply corpus-based tools dynamically in the language learning classroom. Why you need a writing revolution in your classroom and how to lead it *The Writing Revolution (TWR)* provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, *The Writing Revolution* can make a dramatic difference. And the method does more than improve writing skills. It also helps:

- Boost reading comprehension
- Improve organizational and study skills
- Enhance speaking abilities
- Develop analytical capabilities

*The Writing Revolution* is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content. Filled with a year's worth of classroom-tested hands-on, minds-on activities, this resource conveniently includes everything both teachers and students need. The grade 4 book is divided into two units: *Heritage and Identity: Societies from 3000 BCE to 1500 CE* *People and Environments: Political and Physical Regions of Canada* **STAND-OUT FEATURES** focuses on the goals of the Ontario Social Studies curriculum adheres to the *Growing Success* document for assessment, evaluating, and reporting in Ontario schools builds understanding of Indigenous knowledge and perspectives **TIME-SAVING, COST-EFFECTIVE FEATURES** includes the five components of the inquiry model opportunities for self-reflection and activating prior knowledge authentic assessment for, as, and of learning social studies thinking concepts, guided inquiry questions, and learning goals support for developing historical thinking skills access to digital image banks and digital reproducibles (Find download instructions in the Appendix of the book) A notebook just for book reports writing is a great way to keep everything organized and in one place.
