

could surpass all of Apple's Macintosh sales. Of that total, about 1.6 million units will be equipped not with Windows, but Xandros Linux. The Eee is designed to open up new market segments: In the U.S and other developed nations, it will be targeted largely at school students. Equipped with both "learning" programs as well as office and internet applications, the Eee will provide everything that students need regardless of their grade level. Because it is an ultra-light, highly mobile, yet fully capable computer, it will also appeal to business users and first-time computer buyers. This book will cover everything, from turning the machine on and connecting it to the internet, to how to upgrade, update, and generally get the most from these tiny computers.

Excerpt: The Nexus 7 (-sus) is a tablet computer designed and developed by Google in conjunction with Asus. It is the first tablet in the Google Nexus series, a line of consumer devices implementing the Android operating system and built by an original equipment manufacturer (OEM) partner. The Nexus 7 features a 7-inch (180 mm) display, an Nvidia Tegra 3 quad-core chip, 1 GB of RAM, and 8, 16 or 32 GB of internal storage. Incorporating built-in Wi-Fi and near field communication (NFC) connectivity, it is marketed as an entertainment device with integration with Google Play, serving as a platform for multimedia consumption of e-books, television programs, films, games, and music. The tablet was the first device to ship with Android version 4.1, nicknamed "Jelly Bean." Design work on the Nexus 7 began in January 2012 after a meeting between executives of Google and Asus at International CES. The device's design was based on Asus' Eee Pad MeMO ME370T tablet that had been showcased at the conference. Following a rapid four-month development period in which the device was modified to reach a US\$199 price point, mass production of the Nexus 7

Forensics in Telecommunications, Information and Multimedia Oct 27 2022 The Second International Conference on Forensic Applications and Techniques in Telecommunications, Information and Multimedia (e-Forensics 2009) took place in Adelaide, South Australia during January 19-21, 2009, at the Australian National Wine Centre, University of Adelaide. In addition to the peer-reviewed academic papers presented in this volume, the conference featured a significant number of plenary contributions from recognized national and international leaders in digital forensic investigation. Keynote speaker Andy Jones, head of security research at British Telecom, outlined the emerging challenges of investigation as new devices enter the market. These include the impact of solid-state memory, ultra-portable devices, and distributed storage – also known as cloud computing. The plenary session on Digital Forensics Practice included Troy O’Malley, Queensland Police Service, who outlined the paperless case file system now in use in Queensland, noting that efficiency and efficacy gains in using the system have now meant that police can arrive at a suspect’s home before the suspect! Joseph Razik, representing Patrick Perrot of the Institut de Recherche Criminelle de la Gendarmerie Nationale, France, summarized research activities in speech, image, video and multimedia at the IRCGN. The plenary session on The Interaction Between Technology and Law brought a legal perspective to the technological challenges of digital forensic investigation.
