There are two volumes in this series, which totals over 700 pages of expert technical tips for Land Rover's Range Rover Classic - spanning from 1977 to 1992 and have been collated from "Torque", the club magazine of one of the oldest Range Rover Clubs around - the Range Rover Club of Australia, Victoria Branch. Volume 1 has 373 pages and takes tips and articles dated between 1977 and 1986., Contributions come from a mix of Land Rover mechanics and club enthusiasts and include: how these wonderful cars work; getting home if you break down in the middle of nowhere (we call it bush-mechanics, in Australia); modifications; off-road driving and recovery techniques; and many more. The wealth of knowledge from the club that was formed in 1977 is immense; it's still going strong and still has some of the original members.

How to Build a Cheap Hot Rod Apr 08 2021 The ever-escalating cost of building or buying a hot rod is leaving more and more would-be hot rodders behind. This book will get those hopefuls off the sidelines by showing how a hot rod can be built for less than the cost of, say, a new Hyundai. Author Dennis Parks documents his own project--building a quintessentially cool Model T roadster from a "Track-T" kit--showing

in step-by-step detail how to turn a pile of parts into a rockin hot rod. He provides a detailed, easy-to-follow guide for building a car of your own. The advice and instructions cover every aspect of an affordable hot rod build, from establishing the target vehicle and budget, to finding parts, building the car, and fine tuning the finished vehicle on the road. With Parks' money-saving tips and photo-supported how-to sequences, virtually anyone with minimal mechanical skills and the will to use them can be sure of building their hot rod right, and for the right price. The book also includes a full resource guide and recommendations for further reading.
