The year 1960 was an important one in auto manufacturing; it was the year all of the Big Three unveiled entrants in a new class of car called the compact. Chrysler's offering, the Plymouth Valiant, was paired with its redesigned 6-cylinder engine entrant, the Slant Six, known by its nickname the "leaning tower of power." This engine powered the Valiants when they swept the top seven positions in the newly christened compact race that precluded the Daytona 500. The history of the cars in competition is studied, and the author also advises on the practicalities of owning any of these models today, including common problems, parts availability, maintenance and preservation. There are also more than 150 black-and-white photographs from archive sources.
