In Quebec and Scotland, questions of constitutional change, national identity, and national grievance play an important role in the electoral calculations of political parties and voters. Taking a strong stance on the national question can have strategic benefits both for parties pushing for greater autonomy and for those endorsing the status quo. In this in-depth look at issue voting, authors Éric Bélanger, Richard Nadeau, Ailsa Henderson, and Eve Hepburn examine how the

national question affects political parties and voter behaviour in both substate nations. Through party manifestos, interviews with legislators, and opinion survey data, this book demonstrates that calls for constitutional change influence political debate, competition, voter choice, and the outcome of elections not only within Quebec and Scotland but also across Canada and the United Kingdom. Minority nationalist parties, the authors show, can gain support by claiming ownership of issues with widespread public agreement, such as self-determination and protecting the identity and interests of the nation. A comprehensive analysis of recent electoral politics, *The National Question and Electoral Politics in Quebec and Scotland* greatly enhances our understanding of the electoral impact of substate nationalism. Unmanned combat air vehicles, or in common parlance 'drones', have become a prominent instrument in US efforts to counter an objective (and subjective) cross-border terrorist threat with lethal force. As a result, critical questions abound on the legitimacy of their use. In a series of multidisciplinary essays by scholars with an extensive knowledge of international norms, this book explores the question of legitimacy through the conceptual lenses of legality, morality and efficacy, it then closes with the consideration of a policy proposal aimed at incorporating all three indispensable elements. The importance of this inquiry cannot be overstated. Non-state actors fully understand that attacking the much more

powerful state requires moving the conflict away from the traditional battlefield where they are at an enormous disadvantage. Those engaging in terrorism seek to goad the ruling government into an overreaction, or abuse of power, to trigger a destabilization via an erosion of its legitimacy. Thus defending the target of legitimacy”in this case, insuring the use of deadly force is constrained by valid limiting principles”represents an essential strategic interest. This book seeks to come to grips with the new reality of drone warfare by exploring if it can be used to preserve, rather than eat away at, legitimacy. After an extensive analysis of the three key parameters in twelve chapters, the practical proposition of establishing a 'Drone Court' is put forward and examined as a way of pursuing the goal of integrating these essential components to defend the citizenry and the legitimacy of the government at the same time. Muhtadi's analysis of vote-buying in post-democratization Indonesia is original, profound, subtle, nuanced, and convincing as well as beautifully organized and well written. Equally important, its imaginative policy prescriptions will be widely read and cited as a significant contribution to the literature of comparative electoral politics. —William Liddle, Ohio State University, USA This book presents a pathbreaking analysis of vote-buying in Indonesia. Drawing on a stunning array of evidence, Muhtadi reveals the mechanics, patterns and effects of vote-buying with unprecedented clarity. [Title] is a must read for anyone interested in Indonesian politics or in the comparative politics of clientelism. —Edward Aspinall, Australian National University, Australia This book contains a trove of interesting research questions, a novel theoretical contribution, impressive empirical work, and a deep and nuanced understanding of the Indonesian case. —Allen Hicken, University of Michigan, USA This book is open access under a CC BY 4.0 license. This book investigates the impact of vote buying on the accountability of democratic institutions and policy representation in newly democratic countries, with a focus on Indonesia. In doing so, the book presents a wide-ranging study of the dynamics of vote buying in Indonesia's young democracy, exploring the nature, extent, determinants, targeting and

effectiveness of this practice. It addresses these central issues in the context of comparative studies of vote buying, arguing that although party loyalists are disproportionately targeted in vote buying efforts, in total numbers—given the relatively small number of party loyalists in Indonesia—vote buying hits more uncommitted voters. It also demonstrates that the effectiveness of vote buying on vote choice is in the 10 percent range, which is sufficient for many candidates to secure a seat and thus explains why they still engage in vote buying despite high levels of leakage. Burhanuddin Muhtadi is a lecturer at State Islamic University, Jakarta. He is also an executive director of Indonesian Political Indicator and Director of Public Affairs at Indonesian Survey Institute (LSI). He has published his articles in numerous scholarly journals.-- The job interview is probably the most important step you will take in your job search journey. The book contains 256 questions and answers for job interview for hiring on onshore drilling rigs. The book examines several models which have been advocated for a workable and acceptable solution to the Kurdish problem which would be absolutely necessary for stability in the West Asian region. The book evaluates how the more than two-decade long experience of Kurdish self-rule in a democratic framework in Iraqi Kurdistan affects the debate over the other Kurdish regions in West Asia. With Turkey's European Union accession

process contributing to the opening of the political space to ethno-nationalism, there is a need for a non-military solution to the Kurdish issue. The book analyses the role of Kurdish diaspora which plays a significant part in placing the Kurdish question on the European political agenda. It also examines the role of the Kurds in the aftermath of the Arab Spring and the changing geopolitics in the region. Now, the Kurds maintain the strongest platform in battling against the ISIS terrorists. Stimulating Story Writing! Inspiring Children aged 7-11 offers innovative and exciting ways to inspire children to want to create stories and develop their story writing skills. This practical guide offers comprehensive and informed support for professionals to effectively engage 'child authors' in stimulating story writing activity. Packed full of story ideas, resource suggestions and practical activities, the book explores various ways professionals can help children to develop the six key elements of story, these being character, setting, plot, conflict, resolution and ending. All of the ideas in the book are designed to complement and enrich existing writing provision in classrooms with strategies such as role play, the use of different technologies, and using simple open ended resources as story stimuli. Separated into two sections and with reference to the Key Stage 2 curricula, this timely new text provides professionals with tried and tested strategies and ideas that can be used with immediate effect. Chapters include: • Creating

Characters • The Plot Thickens • Inspired Ideas • Resourcing the Story Stimulation

This timely new text is the perfect guide for inspiring children aged 7-11 in the classroom and will be an essential resource for teachers and students on teacher training courses. The book analyses the emerging centre-periphery divisions within the European Union which result from the unprecedented conditions created by the 2008-09 global financial crisis and the subsequent Eurozone sovereign debt crisis. The multiple layers of policy coordination which emerged in response to the crisis have initiated a process by which the EU is increasingly divided in terms of the level of vertical integration between the Eurozone core group and differentiated peripheries amongst the outsiders. At the same time the sovereign debt crisis has created a periphery of predominantly Southern European countries within the Eurozone that became dependent on external financial support from the other member states. The contributions in this book critically examine various aspects of the emerging internal post-crisis constellation of the EU. The main focus lies on national and supranational governance issues, national dynamics and dynamics in the Eurozone core as well as in the periphery. This book was originally published as a special issue of Perspectives on European Politics and Society. The concept of compliance of World Trade Organization (WTO) law as part of international economic law is examined in this

discerning book. The issue of compliance is examined through a broad perspective, considering the key conceptual issues which continue. Taking a global viewpoint, this volume addresses issues arising from recent developments in the enduring and topical debates over Genetically Modified Organisms (GMOs) and their relationship to Intellectual Property (IP). The work examines changing responses to the growing acceptance and prevalence of GMOs. Drawing together perspectives from several of the leading international scholars in this area, the contributions seek to break away from analysis of safety and regulation and examine the diversity of ways the law and GMOs have become entangled. This collection presents the start of a much broader engagement with GMOs and law. As GMO technology becomes increasingly more complex and embedded in our lives, this

volume will be a useful resource in leading further discussion and debate about GMOs in academia, in government and among those working on future policy. Joseph Massad's *Desiring Arabs* (UCP, 2007) was an intellectual/literary history that sought out links between Orientalism and representations of sex and desire, rebutting in the meantime Western efforts to impose categories of heterosexual/homosexual where (in Islam) no such subjectivities exist. His new book broadens the purview to show us what Islam has become in today's world, attending fully to the multiplication of meanings of Islam.” *Islam in Liberalism* is an intellectual/political history, enabling us to understand that history in terms of how Islam operated as a category within western liberalism; another way to phrase this is to say that Massad underscores how the anxieties about what Europe constituted—despotism, intolerance, misogyny, homophobia—have gotten projected onto Islam. It is, he avers, only through this projection that Europe could emerge as democratic, tolerant, gynophilic, and hemophilic—in short, Islam-free. But in fact Islam has been there since the birth of Europe. Liberalism has been the weapon of choice

since the late 18th century against the internal” and external” others of Europe. Massad's brilliant critique of anti-Muslim sexual politics in *Desiring Arabs* is now broadened provocatively to include NGOs, international organizations, and therapeutic programs. He moves from consideration of the meanings of democracy” (and the ideological assumption that Islam” is not compatible with democracy) through chapters on women in Islam, sexuality and/in Islam, psychoanalytic interpretations of Islamic themes, and the more recent development of the idea of Abrahamic religions” among those valorizing an inter-faith agenda. Overall, Massad sets this book up as a biting critique of the sort of liberalism Euro-American propagated and brought as good news” to an unenlightened Islam. Healthy, safe, vibrant communities have at their core leaders and stakeholders who believe in and work together to affect positive change. *The Journey of Collective Impact* provides practical approaches and resources to advance collective impact, and explores new thinking about its application. Community leaders and practitioners of collective impact will find ways to:

- Explore the core conditions of Collective Impact, including developing a common agenda, shared measurement, accessing mutually reinforcing activities, continuous communications and backbone infrastructure
- Apply the Collective Impact framework
- Take Collective Impact to the next level

Community leaders will find a framework for community change in a broad

range of issues including poverty reduction, homelessness, health and wellbeing, and the environment. With contributions from a variety of authors, the articles in this book contain unique perspectives about the application of collective impact. They provide the skills and strategies necessary for success in implementing the collective impact framework. Latest Solved Paper with Scheme of Valuation-2022. This book discusses issues such as global financial crisis and global governance, food security, energy sustainability, the global financial system, trade and protectionism, and growth and employment. Since the outbreak of the financial as well as national debt crises in the Euro zone, the focus of the G20 has shifted back to addressing short-term issues. These issues range from the dynamic effects of global imbalances and the appropriate degree of financial sector regulation to questions of austerity versus growth and the lack of a comprehensive framework for managing the international monetary system. A further issue is the relevance of the G20 agenda for emerging market economies. Global economic recovery still remains fragile and downside risks to global growth remain. Additionally, much of the agenda of the Seoul Development Consensus for shared growth launched in 2010 has yet to be fulfilled. A key discussion point in the book, therefore, is how to make a tangible and significant difference in peoples' lives by implementing an agenda of inclusive growth.?

book dwells upon the various aspects of the Turkish foreign policy in the different regions of the world, especially with the dawn of the twenty-first century. Turkey has attracted international attention due to a marked transformation in the country's domestic and external realms, which in turn, has led to an increased activism in its foreign policy actions. Particularly, Turkey's economic rise has fuelled the country's ambition and quest for a more significant role in international affairs. These transformations have come about with the ascendance of the Adalet ve Kalkınma Partisi (AKP) [or Justice & Development Party (JDP)] to power in 2002. Turkey, under the AKP, moved towards a 'new' direction in the foreign policy and consequently endeavoured to play a larger role in West Asia (Middle East), the Balkans, southern Mediterranean, the Caucasus, Central Asia, Africa and Asia. The country has emerged as a multi-regional player having stakes and tractions on a range of issues in these regions. The several discernible aspects of Turkey's involvement are dealt with in the contributions to this volume. The Interlaw book on Renewable Energy is a comprehensive overview of renewable energy policies and developments in the major countries active in the field. It addresses, in a practical and legal perspective, the main interrogations encountered by investors and policy makers on how to efficiently deploy renewable energy, particularly in terms of support schemes, grid connection costs,

priority and congestion rules or permitting. The job interview is probably the most important step you will take in your job search journey. Since the late 1960s, the novels of Sjöwall and Wahlöö's Martin Beck detective series, along with the works of Henning Mankell, Håkan Nesser and Stieg Larsson, have sparked an explosion of Nordic crime fiction—grim police procedurals treating urgent sociopolitical issues affecting the contemporary world. Steeped in noir techniques and viewpoints, many of these novels are reaching international audiences through film and television adaptations. This reference guide introduces the world of Nordic crime fiction to English-speaking readers. Caught between the demands of conscience and societal strictures, the detectives in these stories—like the heroes of Norse

mythology—know that they and their world must perish, but fight on regardless of cost. At a time of bleak eventualities, Nordic crime fiction interprets the bitter end as a celebration of the indomitable human spirit. Tulsian's Quick Revision for Financial Accounting is a self-study handbook. Loaded with practical questions, this book is a perfect revision text - comprises structured questions based on pattern and scheme adopted in examinations. Zero hours contracts and other forms of casual labour can benefit workers and employers in Scotland but the Scottish Affairs Committee's inquiry has shown that, too often, the relationship is unbalanced, leaving the employer with all of the flexibility and few costs and the worker in fear of dismissal, denied access to due rights of employment and, in some cases, earning less than the minimum wage. The Government recognises that poor practice exists and needs to be addressed but the UK Government's consultation on zero hours contracts was too narrow. The Government must do more to protect workers who wish to challenge unfair, unsafe or unlawful conditions of employment. Workers should be told from the outset of their employment what type of contract they are on and a written contract setting out the terms and conditions must follow within two months. There should be a minimum notice period of work and workers should not be punished for turning down offers of work made within that period. Where workers arrive for work but find none available then the

employer should compensate them for the inconvenience. Travel time between appointments should be paid and pay for zero hours workers should accurately reflect the number of hours that are worked to fulfil contracted duties. The recommendations will improve the working conditions of people on zero hours contracts but the Committee's overriding conclusion is that, in the majority of cases, zero hours contracts need not and should not be used at all. • Latest Board Examination Paper-2022 (Held on April-2022) with Board Model Answer • Strictly as per the latest syllabus, blueprint & design of the question paper. • Board-specified typologies of questions for exam success • Perfect answers with Board Scheme of Valuation • Hand written Toppers Answers for exam-oriented preparation • NCERT Textbook Questions fully solved (Only For Science, Social and Maths) • KTBS Textbook Questions fully solved
