Business Intelligence Tools for Small Companies Oct 11 2021 Learn how to transition from Excel-based business intelligence (BI) analysis to enterprise stacks of open-source BI tools. Select and implement the best free and freemium open-source BI tools for your company's needs and design, implement, and integrate BI automation across the full stack using agile methodologies. Business Intelligence Tools for Small Companies provides hands-on demonstrations of open-source tools suitable for the BI requirements of small businesses. The authors draw on their deep experience as BI consultants, developers, and administrators to guide you through the extract-transform-load/data warehousing (ETL/DWH) sequence of extracting data from an enterprise resource planning (ERP) database freely available on the Internet, transforming the data, manipulating them, and loading them into a relational database. The authors demonstrate how to extract, report, and dashboard key performance indicators (KPIs) in a visually appealing format from the relational database management system (RDBMS). They model the selection and implementation of free and freemium tools such as Pentaho Data Integrator and Talend for ELT, Oracle XE and MySQL/MariaDB for RDBMS, and QlikSense, Power BI, and MicroStrategy Desktop for reporting. This richly illustrated guide models the deployment of a small company BI stack on an inexpensive cloud platform such as AWS. What You'll Learn You will learn how to manage, integrate, and automate the processes of BI by selecting and implementing tools to: Implement and manage the business intelligence/data warehousing (BI/DWH) infrastructure Extract data from any enterprise resource planning (ERP) tool Process and integrate BI data using open-source extract-transform-load (ETL) tools Query, report, and analyze BI data using open-source visualization and dashboard tools Use a MOLAP tool to define next year's budget, integrating real data with target scenarios Deploy BI solutions and big data experiments inexpensively on cloud platforms Who This Book Is For Engineers, DBAs, analysts, consultants, and managers at small companies with limited resources but whose BI requirements have outgrown the limitations of Excel spreadsheets; personnel in mid-sized companies with established BI systems who are exploring technological updates and more cost-efficient solutions

SPIN® -Selling Dec 01 2020 True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling

provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

Advanced PHP and OpenERP / Odoo 7 Interfacing Aug 21 2022 Versi PDF atau Pembayaran Lewat Paypal/BCA/Mandiri disini: <http://shop.vitraining.co> OpenERP / Odoo provides an application programming interface using it's XML-RPC webservice. The service is ready to be accessed by any programming language that is capable on communication through XML-RPC interface. This book explain in details on how to setup, configure, and do the integration of external system into OpenERP/ Odoo. Started with the OpenERP installation steps both for Linux and Windows, then PHP XAMPP installation for both operating systems, and the required preparation steps to take in order that the systems are ready to be integrated together. Taking PHP as the interfacing scripting language using it's XML-RPC library, this book explains how to create a PHP class that contains methods for login, search, read, create, delete, and update data stored on OpenERP. Then how to use that class for real life example on accessing a legacy MySQL database and importing the data into OpenERP, and managing the status of already imported data. PHP provides a wide variety of object oriented frameworks, so this book also explain on how to use the class from inside a PHP framework, taking Yii Framework as an example. At the end of the topics, it's explained on how to automate the integration process periodically. In Linux we utilize the cron job, and in Windows we use the Task Scheduler. The book is live, downloadable, and purchasable from Google Play store, but you can also purchase it directly from <http://vitraining.com/shop> where payment can be made in local Indonesian bank.
