Over vast expanses of time, fire and humanity have interacted to expand the domain of each, transforming the earth and what it means to be human. In this concise yet wide-ranging book, Stephen J. Pyne—named by Science magazine as “the world’s leading authority on the history of fire”—explores the surprising dynamics of fire before humans, fire and human origins, aboriginal economies of hunting and foraging, agricultural and pastoral uses of fire, fire ceremonies, fire as an idea and a technology, and industrial fire. In this revised and expanded edition, Pyne looks to the future of fire as a

constant, defining presence on Earth. A new chapter explores the importance of fire in the twenty-first century, with special attention to its role in the Anthropocene, or what he posits might equally be called the Pyrocene. For more than a century, the spectacular mountain range known as the Tetons has beckoned hikers, climbers, and the simply curious. In this second edition of a classic work, the processes that created this astonishing landscape are clearly described and richly illustrated. Using their 140 years combined experience, three geologists unlock the secrets of a land sculpted by fire, ice, and shifting tectonic plates. Their work is also a story of a revolution in scientific thinking, and the ways that revolution has revealed even more of the story's details. Accompanied by more than one hundred photographs and illustrations, the text is highly readable and scientifically accurate. It rewards the reader with the perspectives and discoveries of three geologists whose professional and personal lives are deeply intertwined with Jackson Hole and the Teton Range. "The definitive work on the West's water crisis." --Newsweek The story of the American West is the story of a relentless quest for a precious resource: water. It is a tale of rivers diverted and dammed, of political corruption and intrigue, of billion-dollar battles over water rights, of ecological and economic disaster. In his landmark book, *Cadillac Desert*, Marc Reisner writes of the earliest settlers, lured by the promise of paradise, and of the ruthless tactics employed by Los Angeles politicians and business interests to ensure the city's growth. He documents the bitter rivalry between two government giants, the Bureau of Reclamation and the U.S. Army Corps of Engineers, in the competition to transform the West. Based on more than a decade of research, *Cadillac Desert* is a stunning expose and a dramatic, intriguing history of the creation of an Eden--an Eden that may only be a mirage. This edition includes a new postscript by Lawrie Mott, a former staff

scientist at the Natural Resources Defense Council, that updates Western water issues over the last two decades, including the long-term impact of climate change and how the region can prepare for the future. The teachings of the Native Americans provide a connection with the land, the environment, and the simple beauties of life. This collection of writings from revered Native Americans offers timeless, meaningful lessons on living and learning. Taken from writings, orations, and recorded observations of life, this book selects the best of Native American wisdom and distills it to its essence in short, digestible quotes — perhaps even more timely now than when they were first written. In addition to the short passages, this edition includes the complete *Soul of an Indian*, as well as other writings by Ohiyesa (Charles Alexander Eastman), one of the great interpreters of American Indian thought, and three great speeches by Chiefs Joseph, Seattle, and Red Jacket. Every year millions of Americans visit national parks and monuments, state and municipal parks, battlefield areas, historic houses, and museums. By means of guided tours, exhibits, and signs, visitors to these areas receive a very special kind of education.

INTERNATIONAL BESTSELLER • With a new foreword by Tim Ferriss • “Vagabonding easily remains in my top-10 list of life-changing books. Why? Because one incredible trip, especially a long-term trip, can change your life forever. And Vagabonding teaches you how to travel (and think), not just for one trip, but for the rest of your life.”—Tim Ferriss, from the foreword

There’s nothing like vagabonding: taking time off from your normal life—from six weeks to four months to two years—to discover and experience the world on your own terms. In this one-of-a-kind handbook, veteran travel writer Rolf Potts explains how anyone armed with an independent spirit can achieve the dream of extended overseas travel. Now completely revised and updated, *Vagabonding* is an accessible and inspiring guide to

- financing your travel time
- determining your destination
- adjusting to life on the road
- working and volunteering overseas
- handling travel adversity
- re-assimilating back into ordinary life

Updated for our ever-changing world, *Vagabonding* is an indispensable guide for the modern traveler.

Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical "missing years" in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World War I; and other issues crucial to the future of the fledgling park system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century. "The great lights who have come out of all the world's spiritual traditions and graduated from earth's schoolroom have become widely known as masters. They demonstrate that in the world of Spirit, there is no division of race, religion or philosophy—there is simply oneness, ineffable sweetness and love. What is not so widely known is that these great masters have retreats—temples and cities of light in the heaven world—where we can go in spiritual meditation and while our bodies sleep

at night. In this comprehensive work, Mark and Elizabeth Prophet talk about these great masters, the stories of their lives and their magnificent spiritual retreats." In this hugely appealing book, a finalist for the Pulitzer Prize, acclaimed author and journalist Daniel Okrent weaves together themes of money, politics, art, architecture, business, and society to tell the story of the majestic suite of buildings that came to dominate the heart of midtown Manhattan and with it, for a time, the heart of the world. At the center of Okrent's riveting story are four remarkable individuals: tycoon John D. Rockefeller, his ambitious son Nelson Rockefeller, real estate genius John R. Todd, and visionary skyscraper architect Raymond Hood. In the tradition of David McCullough's *The Great Bridge*, Ron Chernow's *Titan*, and Robert Caro's *The Power Broker*, *Great Fortune* is a stunning tribute to an American landmark that captures the heart and spirit of New York at its apotheosis. work on the study of Atlantis, the author puts
forth the idea that this was the true place where
civilization began. This one book has done more
than any other in promoting the idea for the lost
continent of Atlantis. John C. Frémont, nearly
forgotten today, was one of the giants of
nineteenth-century America. He led five
expeditions into the American West in the 1840s
and 1850s, covering a greater area than any
other explorer. His expedition reports -- ghost-
written by his beautiful and talented wife, Jessie
Benton Frémont -- were bestsellers in their day.
Riding the wave of his popularity, he captured

the Republican Party nomination for president in
1856 but narrowly lost the election. Frémont's
scout on three of his expeditions was Kit Carson.
Frémont fancied himself a mountaineer, and he
possessed great stamina and courage, but he
lacked Carson's skills and knowledge. The only
expedition Frémont led without Carson was a
disaster that, like the better-known Donner
Party debacle, culminated in one of the rare
documented instances of cannibalism in
American history. A Newer World is the
fascinating story of the Frémont-Carson
expeditions and of two men, utterly unlike in so
many ways, who became friends as well as
fellow explorers. Frémont owed his life to
Carson, who saved him on several occasions,
while the legend of Kit Carson, the greatest
mountain man of his day, grew out of Frémont's
expedition reports. The Frémont-Carson
expeditions are second only to Lewis and Clark's
in their significance for America's western
expansion. Their 1845-46 campaign, for
example, helped to precipitate the Mexican-
American War and led to the wresting of
California from Mexico. Carson is often
remembered today for his 1863-64 roundup of
Apaches and Navajos, leading to the infamous
Long Walk. David Roberts demonstrates that
Carson, who was twice married to Indian
women, was profoundly ambivalent about the
campaign, which was ordered by an Army officer
who was his superior. Throughout the book,
Roberts draws on little-known primary sources
in telling the dramatic stories of these
expeditions. He shows how Frémont saw himself
as a historical figure, especially in his reports,
while Carson -- taciturn where Frémont was
outspoken, modest where Frémont was boastful,
and, significantly, illiterate -- was oblivious to his
own fame. Yet it was Carson who underwent an
evolution from an Indian killer to an Indian
advocate. In addition to his archival research,
Roberts traveled the routes of Frémont and
Carson's expeditions to gain a firsthand
knowledge of the territory they explored. In
analyzing how Frémont and Carson advanced
the Americanizing of the West, Roberts writes
with a modern-day sensitivity to the Indians, for
whom these expeditions were a tragedy.
America's first national park, Yellowstone
contains an incomparable combination of natural

beauty, rugged wilderness, and abundant wildlife. Nearby, Grand Teton National Park is renowned for its magnificent, jagged, snow-capped peaks. This guidebook to these parks is chock-full of dazzling photos of the majestic geysers, lakes, and wildlife, including favorite places to explore, from the popular hot spots to the remote backcountry. Special in-depth sections on geothermal features and winter adventures are included. America's national parks are breathing spaces in a world in which such spaces are steadily disappearing, which is why more than 300 million people visit the parks each year. Now Terry Tempest Williams, the author of the environmental classic *Refuge* and the beloved memoir *When Women Were Birds*, returns with *The Hour of Land*, a literary celebration of our national parks, an exploration of what they mean to us and what we mean to them. From the Grand Tetons in Wyoming to Acadia in Maine to Big Bend in Texas and more, Williams creates a series of lyrical portraits that illuminate the unique grandeur of each place while delving into what it means to shape a landscape with its own evolutionary history into something of our own making. Part memoir, part natural history, and part social critique, *The Hour of Land* is a meditation and a manifesto on why wild lands matter to the soul of America. Chilcote and Susan Marsh, is a celebration of the efforts done by individuals and organizations to protect and conserve the Wyoming Range lands. This exquisite publication highlights the beauty and wild life of the Wyoming Range through extraordinary photographs from Ronald H. Chilcote, Susan Marsh, Tom Mangelsen, Henry Holdworth, Fred Pflughoft, Fran Chilcote, and Rita Donham. Accompanying the four portfolios of photographs - of the Wyoming Range, the Greys River area, the Salt River Front, and the southern ranges - are essays by Susan Marsh, Florence Shepard, Erik Movar, and C.L. Rawlins. Set in Wyoming in pioneer days. The hero, never named, provokes the enmity of a local bad man named Trampas. In a poker game, Trampas accuses the Virginian of cheating and impugns his ancestry. Instantly the Virginian's pistol is drawn and put on the table before him, and he utters the catch phrase "When you call me that, smile." Trampas backs down. Later the Virginian rescues a New England schoolmistress from a stage coach that has been marooned in high water by a drunken driver. Eventually they get married. The novel's climax is a pistol duel between Trampas and the Virginian in which Trampas is vanquished, the scene constituting the first known walkdown in American literature. The author had first gone to Wyoming for health reasons on the advice of Theodore Roosevelt. Wister dedicated the novel to Roosevelt and many of the Virginian's traits and ideals resemble Roosevelt's. According to Wister, writing in the 16th edition of the book, the hero is a combination of several men he had known in Wyoming. It became the prototype for all cowboy heroes. Master Bible scholar and teacher Marc Brettler argues that today's contemporary readers can only understand the ancient Hebrew Scripture by knowing more

about the culture that produced it. And so Brettler unpacks the literary conventions, ideological assumptions, and historical conditions that inform the biblical text and demonstrates how modern critical scholarship and archaeological discoveries shed light on this fascinating and complex literature. Brettler surveys representative biblical texts from different genres to illustrate how modern scholars have taught us to "read" these texts. Using the "historical-critical method" long popular in academia, he guides us in reading the Bible as it was read in the biblical period, independent of later religious norms and interpretive traditions. Understanding the Bible this way lets us appreciate it as an interesting text that speaks in multiple voices on profound issues. This book is the first "Jewishly sensitive" introduction to the historical-critical method. Unlike other introductory texts, the Bible that this book speaks about is the Jewish one -- with the three-part TaNaKH arrangement, the sequence of books found in modern printed Hebrew editions, and the chapter and verse enumerations used in most modern Jewish versions of the Bible. In an afterword, the author discusses how the historical-critical method can help contemporary Jews relate to the Bible as a religious text in a more meaningful way. During the 1906 San Francisco earthquake, the Point Reyes Peninsula, forty miles farther north along the San Andreas Fault, shook loose from its temporary moorings to the California coastline and lurched to the northwest by some twenty feet. The powerful quake that terrorized the city also tore through the land and jarred the rural inhabitants of Point Reyes. It was another abrupt step in the peninsula's slow creep from southern

to northern California, yielding a piece of land quite divergent from the California mainland to which it is now affixed. Although pressure along the San Andreas Fault continued to build for the remainder of the century, there were no other geologic events of a magnitude that could so drastically alter the land's surface. By contrast, human events since 1906 have significantly altered the peninsula's landscape. In the century following the earthquake, economic, cultural, and political forces gradually reshaped Point Reyes. Possibly the biggest tremor took place in 1962, when Congress created, and President John F. Kennedy signed into law, the Point Reyes National Seashore. At that juncture, the political geography of the land, as a new unit of the National Park Service (NPS), was about to change dramatically. This volume, *Managing a Land in Motion: An Administrative History of Point Reyes National Seashore*, traces, explains, and analyzes the ideas and events that produced the national seashore and transpired in the forty years that followed. As the world's first national park, it is globally recognized as the crown jewel of modern environmental preservation. But the park and its surrounding regions have recently become a lightning rod for environmental conflict, plagued by intense and intractable political struggles among the federal government, National Park Service, environmentalists, industry, local residents, and elected officials. *The Battle for Yellowstone* asks why it is that, with the flood of expert scientific, economic, and legal efforts to resolve disagreements over Yellowstone, there is no improvement? Why do even seemingly minor issues erupt into impassioned disputes? What can Yellowstone teach us about the worsening environmental conflicts worldwide? Justin Farrell argues that the battle for Yellowstone has deep moral, cultural, and spiritual roots that until now have been obscured by the supposedly rational and technical nature of the conflict. Tracing in unprecedented detail the moral causes and consequences of large-scale social change in the American West, he describes how a "new-west" social order has emerged that has devalued traditional American beliefs about manifest destiny and rugged individualism, and how morality and spirituality have influenced the most polarizing and techno-centric conflicts in Yellowstone's history. This groundbreaking book shows how the unprecedented conflict over Yellowstone is not all about science, law, or economic interests, but more surprisingly, is about cultural upheaval and the construction of new moral and spiritual boundaries in the American West. In this compelling and influential work, Joseph Campbell scours the myths of the world to reveal the characteristics common to heroes from all cultures and periods. "Field Book of Western Wild Flowers" by J. J. Thornber, Margaret Armstrong. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From

well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Written by a leading authority on Shaktic and Tantric thought, this book is considered the prime document for study and application of Kundalini yoga. It probes the philosophical and mythological nature of Kundalini; the esoteric anatomy associated with it; the study of mantras; the chakras, or psychic centers in the human body; the associated yoga and much, much more. Two important Tantric documents are included: *The Description of the Six Chakras* and *Five-fold Footstool*. full of wisdom drawn from the major sacred
Scriptures of the world and various schools of
philosophical thought, as well as from scientists,
artists, historians, and others. Its aim is to assist
people of all ages to learn more about the
universal truths of life that transcend modern
times or particular cultures. This treasury of
practical morality, personal inspiration, and
daily guidance is perfect for people of all
persuasions. The organization facilitates group
or personal study and spiritual development. The
future of Yellowstone is in their hands . . .
Detective Weda is a woman of today: smart,
independent, and able to do anything she sets
her mind to. Growing up on the Rez, she's been
taught about the traditions of her ancestors, but

all she wants is to live in the modern world and
escape the dreams that have haunted her since
childhood. Just when she thinks she's broken
free from her past by starting a new life in New
York, people close to her die and the dreams
return... *Wo'itsa* has always been content with
his role as a hunter of the Tukudeka. A confusing
vision reveals images of the past as well as an
uncertain future, leaving his ordinary life in
turmoil. When a mysterious elder of the Sky
People approaches him and offers answers,
Wo'itsa is more than eager to help pave the way
for generations to come. But something doesn't
seem quite right . . . When a woman from the
twenty-first century and a hunter from the
1700's are thrown together in the most unlikely
circumstance, there is sure to be mistrust,
miscommunication, and mistaken identity.
Tensions build when their paths repeatedly
intersect as they race through time to secure the
future of the sacred mountains in what is to
become Yellowstone National Park. What will it
take for them to let down their guards and see
clearly the true enemy that is determined to
keep them apart? ***Content warning: This book
contains mild language, mild violence, and
intimacy between consenting adults. Heat rating

Annotation The essays contained in this book are
preliminary studies directed toward a new

synthesis of the history of the religion of Israel. Each study is addressed to a special and, in the authors view, unsolved problem in the description of Israel's religious development. Expertly arranged Chamber Trio by Johannes Brahms from the Kalmus Edition series. This Trio is from the Romantic era.
