**Race and Nation** Apr 25 2020 Race and Nation is the first book to compare the racial and ethnic systems that have developed around the world. It is the creation of nineteen scholars who are experts on locations as far-flung as China, Jamaica, Eritrea, Brazil, Germany, Punjab, and South Africa. The contributing historians, sociologists, anthropologists, political scientists, and scholars of literary and cultural studies have engaged in an ongoing conversation, honing a common set of questions that dig to the heart of racial and ethnic groups and systems. Guided by those questions, they have created the first book that explores the similarities, differences, and the relationships among the ways that race and ethnicity have worked in the modern world. In so doing they have created a model for how to write world history that is detailed in its expertise, yet also manages broad comparisons.

**Tuning Out Blackness** Nov 01 2020 Tuning Out Blackness fills a glaring omission in U.S. and Latin American television studies by looking at the history of Puerto Rican television. In exploring the political and cultural dynamics that have shaped racial representations in Puerto Rico's commercial media from the late 1940s to the 1990s, Yeidy M. Rivero advances critical discussions about race, ethnicity, and the media. She shows that televisual representations of race have belied the racial egalitarianism that allegedly pervades Puerto Rico's national culture. White performers in blackface have often portrayed "blackness" in local television productions, while black actors have been largely excluded. Drawing on interviews, participant observation, archival research, and textual analysis, Rivero considers representations of race in Puerto Rico, taking into account how they are intertwined with the island's status as a U.S. commonwealth, its national culture, its relationship with Cuba before the Cuban Revolution in 1959, and the massive influx of Cuban migrants after 1960. She focuses on locally produced radio and television shows, particular television events, and characters that became popular media icons—from the performer Ramón Rivero's use of blackface and "black" voice in the 1940s and 1950s, to the battle between black actors and television industry officials over racism in the 1970s, to the creation, in the 1990s, of the first Puerto Rican situation comedy featuring a black family. As the twentieth century drew to a close, multinational corporations had purchased all Puerto Rican stations and threatened to wipe out locally produced programs. Tuning Out Blackness brings to the forefront the marginalization of nonwhite citizens in Puerto Rico's media culture and raises important questions about the significance of local sites of television production.

**At the Roots of Italian Identity** Mar 25 2020 This book investigates the relationship between the ideas of nation and race among the nationalist intelligentsia of the Italian Risorgimento and argues that ideas of race played a considerable role in defining Italian national identity. The author argues that the racialization of the Italians dates back to the early Napoleonic age and that naturalistic racialism—or race-thinking based on the taxonomies of the natural history of man—emerged well before the traditionally presumed date of the late 1860s and the advent of positivist anthropology. The book draws upon a wide number of sources including the work of Vincenzo Cuoco, Giuseppe Micali, Adriano Balbi, Alessanro Manzoni, Giandomenico Romagnosi, Cesare Balbo, Vincenzo Gioberti, and Carlo Cattaneo. Themes explored include links to antiquity on the Italian peninsula, archaeology, and race-thinking.

*Race, Nation, War* Jul 09 2021 This book examines international post-9/11 policies by connecting them to the US violations of Japanese Americans' human rights during World War II. Analysing the policies of the United States, Race, Nation, War illustrates how ideas of race and masculinity shaped the indefinite leave policy which the government used to move Japanese Americans out of camps during the war. With attention to recent American and European policies, the author demonstrates that race, gender, and nation also converge in President Trump's policies on refugees and human rights, the German and European migrant crises, and related German policies and politics. Assayed from a unique city and regional planning perspective, Race, Nation, War will appeal not only to scholars of planning, but also to those with interests in American Studies, gender studies, race and ethnicity, sociology, history, and public policy.

**Who Do We Think We Are?** Oct 24 2022 In this timely and well-argued book, author Philip Nicholson offers a provocative explanation of the force and place of race in modern history, showing that race and nation have a linked history. Using the deliberately ironic metaphor of the double helix, the author shows the close historical connection of race and nation as each interrelates with the other in shaping and carrying social and institutional practices over many centuries. -- Five themes recur throughout the work: -- modernity is built on the twin pillars of race and nation; -- national instability, rivalry, and imperial conquest -- outside of dynastic, religious, or feudal disputes -- evoke differential (i.e., racial) human social categories, loyalties, and mythologies; -- racial vilification emerges out of material and cultural expropriation; -- racial degradation is typically the inverse projection of dominant national normative values, beliefs, or ideals; and -- race and nation share in the twists and turns of modern histo and are inseparably linked and interdependent.

**Uneven Encounters** Jan 23 2020 In Uneven Encounters, Micol Seigel chronicles the exchange of popular culture between Brazil and the United States in the years between the World Wars, and demonstrates how that exchange affected ideas of race and nation in both countries. From Americans interpreting advertisements for Brazilian coffee or dancing the Brazilian maxixe, to Rio musicians embracing the "foreign" qualities of jazz, Seigel traces a lively, cultural back and forth. Along the way, she shows how race and nation for both elites and non-elites are constructed together, and driven by global cultural and intellectual currents as well as local, regional, and national ones. Seigel explores the circulation of images of Brazilian coffee and of maxixe in the United States during the period just after the imperial expansions of the early twentieth century. Exoticist interpretations structured North Americans' paradoxical sense of themselves as productive "consumer citizens." Some people, however, could not simply assume the privileges of citizenship. In their struggles against racism, Afro-descended citizens living in Rio de Janeiro, São Paulo, New York, and Chicago encountered images and notions of each other, and found them useful. Seigel introduces readers to cosmopolitan Afro-Brazilians and African Americans who rarely traveled far from home but who nonetheless absorbed ideas from abroad. She suggests that studies comparing U.S. and Brazilian racial identities as two distinct constructions are misconceived. Racial formation transcends national borders; attempts to understand it must do the same.

*Making Race and Nation* Apr 18 2022 In this bold, original and persuasive book, Anthony W. Marx provocatively links the construction of nations to the construction of racial identity. Using a comparative historical approach, Marx analyzes the connection between race as a cultural and political category rooted in the history of slavery and colonialism, and the development of three nation states. He shows how each country's differing efforts to establish national unity and other institutional impediments have served, through the nation-building process and into their present systems of state power, to shape and often crystallize categories and divisions of race. Focusing on South Africa, Brazil and the United States, Marx illustrates and elucidates the historical dynamics and institutional relationships by which the construction of race and the development of these nations have informed one another. Deftly combining comparative history, political science and sociological interpretation, sharpened by over three-hundred interviews with key informants from each country, he follows this dialogue into the present to discuss recent political mobilization, popular protest and the current salience of race issues. Anthony W. Marx is Associate Professor of Political Science at Columbia University and has been a Visiting Professor at Yale University

**Diana, A Cultural History** Nov 13 2021 This book intervenes in debates over the significance of Diana, Princess of Wales by offering a critical account of her media iconicity from 1981 to the present. It outlines the historical development of representations of Diana, analysing the ways in which the Princess has been understood via discourses of gender, sexuality, race, economic class, the royal, national identity, and the human. The book then goes on to assess the issues at stake in debates over the 'meaning' of Diana, such as the gender politics of cultural icon-making and deconstruction, and conflicting notions of cultural value.

**Race, Nation, & Empire in American History** Jun 20 2022 While public debates over America's current foreign policy often treat American empire as a new phenomenon, this lively collection of essays offers a pointed reminder that visions of national and imperial greatness were a cornerstone of the new country when it was founded. In fact, notions of empire have long framed debates over western expansion, Indian removal, African slavery, Asian immigration, and global economic dominance, and they persist today despite the proliferation of anti-imperialist rhetoric. In fifteen essays, distinguished historians examine the central role of empire in American race relations, nationalism, and foreign policy from the founding of the United States to the twenty-first century. Full of transnational connections and cross-pollinations, of people appearing in unexpected places, the essays are also stories of people being put, quite literally, in their place by the bitter struggles over the boundaries of race and nation.

Collectively, these essays demonstrate that the seemingly contradictory processes of boundary crossing and boundary making are and always have been intertwined. The contributors are James T. Campbell, Ruth Feldstein, Kevin K. Gaines, Matt Garcia, Matthew Pratt Guterl, George Hutchinson, Matthew Frye Jacobson, Prema Kurien, Robert G. Lee, Eric Love, Melani McAlister, Joanne Pope Melish, Louise M. Newman, Vernon J. Williams Jr., and Natasha Zaretsky. The editors are James T. Campbell, Matthew Pratt Guterl, and Robert G. Lee.

**Incorporations** Mar 17 2022 Incorporations offers a new way of thinking about issues of race, bodies, and commodity culture. Moving beyond the study of identity and difference in media, Eva Cherniavsky asserts that race can be understood as a sign of the body's relation to capital. In Incorporations, Cherniavsky interrogates the interplay of nationalism, colonialism, and capitalism in the production of racial embodiment. Testing the links between race and capital, Incorporations examines how media culture transmutes white bodies into commodity-images in such films as Blonde Venus, A Touch of Evil, and Fargo, and in the television series The Simpsons and the fiction of Octavia Butler and Leslie Marmon Silko. Cherniavsky posits an innovative approach to whiteness studies that does not focus on the emancipatory possibilities of cross-racial identification. Working with the tools of critical race theory as well as postcolonial and cultural studies, Cherniavsky demonstrates how representations of racial embodiment have evolved, and suggests that "race" is the condition of exchangeable bodies under capital. Eva Cherniavsky is professor of American literature and culture at the University of Washington. She is the author of That Pale Mother Rising: Sentimental Discourses and the Imitation of Motherhood in Nineteenth-Century America.

**American Crucible** Apr 30 2023 This sweeping history of twentieth-century America follows the changing and often conflicting ideas about the fundamental nature of American society: Is the United States a social melting pot, as our civic creed warrants, or is full citizenship somehow reserved for those who are white and of the "right" ancestry? Gary Gerstle traces the forces of civic and racial nationalism, arguing that both profoundly shaped our society. After Theodore Roosevelt led his Rough Riders to victory during the Spanish American War, he boasted of the diversity of his men's origins- from the Kentucky backwoods to the Irish, Italian, and Jewish neighborhoods of northeastern cities. Roosevelt's vision of a hybrid and superior "American race," strengthened by war, would inspire the social, diplomatic, and economic policies of American liberals for decades. And yet, for all of its appeal to the civic principles of inclusion, this liberal legacy was grounded in "Anglo-Saxon" culture, making it difficult in particular for Jews and Italians and especially for Asians and African Americans to gain acceptance. Gerstle weaves a compelling story of events, institutions, and ideas that played on perceptions of ethnic/racial difference, from the world wars and the labor movement to the New Deal and Hollywood to the Cold War and the civil rights movement. We witness the remnants of racial thinking among such liberals as FDR and LBJ; we see how Italians and Jews from Frank Capra to the creators of Superman perpetuated the New Deal philosophy while suppressing their own ethnicity; we feel the frustrations of African-American servicemen denied the opportunity to fight for their country and the moral outrage of more recent black activists, including Martin Luther King, Jr., Fannie Lou Hamer, and Malcolm X. Gerstle argues that the civil rights movement and Vietnam broke the liberal nation apart, and his analysis of this upheaval leads him to assess Reagan's and Clinton's attempts to resurrect nationalism. Can the United States ever live up to its civic creed? For anyone who views racism as an aberration from the liberal premises of the republic, this book is must reading. Containing a new chapter that reconstructs and dissects the major struggles over race and nation in an era defined by the War on Terror and by the presidency of Barack Obama, American Crucible is a must-read for anyone who views racism as an aberration from the liberal premises of the republic.

[\*Race, Ethnicity And Nation\*](#) Dec 14 2021 This text offers an international and comparative analysis of social division rooted in race, ethnicity and national identity. [\*A Nation for All\*](#) Oct 12 2021 After thirty years of anticolonial struggle against Spain and four years of military occupation by the United States, Cuba formally became an independent republic in 1902. The nationalist coalition that fought for Cuba's freedom, a movement in which blacks and mulattoes were well represented, had envisioned an egalitarian and inclusive country—a nation for all, as Jose Marti described it. But did the Cuban republic, and later the Cuban revolution, live up to these expectations? Tracing the formation and reformulation of nationalist ideologies, government policies, and different forms of social and political mobilization in republican and postrevolutionary Cuba, Alejandro de la Fuente explores the opportunities and limitations that Afro-Cubans experienced in such areas as job access, education, and political representation. Challenging assumptions of both underlying racism and racial democracy, he contends that racism and antiracism coexisted within Cuban nationalism and, in turn, Cuban society. This coexistence has persisted to this day, despite significant efforts by the revolutionary government to improve the lot of the poor and build a nation that was truly for all.

[\*Making Race and Nation\*](#) Sep 23 2022 Why and how has race become a central aspect of politics during this century? This book addresses this pressing question by comparing South African apartheid and resistance to it, the United States Jim Crow law and protests against it, and the myth of racial democracy in Brazil. Anthony Marx argues that these divergent experiences had roots in the history of slavery, colonialism, miscegenation and culture, but were fundamentally shaped by impediments and efforts to build national unity. In South Africa and the United States, ethnic or regional conflicts among whites were resolved by unifying whites and excluding blacks, while Brazil's longer established national unity required no such legal racial crutch. Race was thus central to projects of nation-building, and nationalism shaped uses of race. Professor Marx extends this argument to explain popular protest and the current salience of issues of race.

[\*Race, Nation, and Refuge\*](#) May 27 2020 Explores the role of rhetoric and the racial classification of Asian American immigrants in the early twentieth century. From 1870 to 1940, racial eligibility for naturalization in the United States was limited to “free white persons” and “aliens of African nativity and persons of African descent,” and many interpreted these restrictions to reflect a policy of Asian exclusion based on the conclusion that Asians were neither white nor African. Because the distinction between white and Asian was considerably unstable, however, those charged with the interpretation and implementation of the naturalization act faced difficult racial classification questions. Through archival research and a close reading of the arguments contained in the documents of the US Bureau of Naturalization, especially those documents that discussed challenges to racial eligibility for naturalization, Doug Coulson demonstrates that the strategy of foregrounding shared external threats to the nation as a means of transcending perceived racial divisions was often more important to racial classification than legal doctrine. He argues that this was due to the rapid shifts in the nation’s enmities and alliances during the early twentieth century and the close relationship between race, nation, and sovereignty. Doug Coulson is Assistant Professor of English at Carnegie Mellon University.

[\*Insurgent Cuba\*](#) Aug 10 2021 In the late nineteenth century, in an age of ascendant racism and imperial expansion, there emerged in Cuba a movement that unified black, mulatto, and white men in an attack on Europe's oldest empire, with the goal of creating a nation explicitly defined

[\*\*Race, Nation, and Citizenship in Postcolonial Africa\*\*](#) Sep 11 2021 Nationalism has generated violence, bloodshed, and genocide, as well as patriotic sentiments that encourage people to help fellow citizens and place public responsibilities above personal interests. This study explores the contradictory character of African nationalism as it unfolded over decades of Tanzanian history in conflicts over public policies concerning the rights of citizens, foreigners, and the nation's Asian racial minority. These policy debates reflected a history of racial oppression and foreign domination and were shaped by a quest for economic development, racial justice, and national self-reliance.

[\*Taifa\*](#) Feb 22 2020 Taifa is a story of African intellectual agency, but it is also an account of how nation and race emerged out of the legal, social, and economic histories in one major city, Dar es Salaam. Nation and race—both translatable as taifa in Swahili—were not simply universal ideas brought to Africa by European colonizers, as previous studies assume. They were instead categories crafted by local African thinkers to make sense of deep inequalities, particularly those between local Africans and Indian immigrants. Taifa shows how nation and race became the key political categories to guide colonial and postcolonial life in this African city. Using deeply researched archival and oral evidence, Taifa transforms our understanding of urban history and shows how concerns about access to credit and housing became intertwined with changing conceptions of nation and nationhood. Taifa gives equal attention to both Indians and Africans; in doing so, it demonstrates the significance of political and economic connections between coastal East Africa and India during the era of British colonialism, and illustrates how the project of racial nationalism largely severed these connections by the 1970s.

[\*The Color of Modernity\*](#) Feb 16 2022 In *The Color of Modernity*, Barbara Weinstein focuses on race, gender, and regionalism in the formation of national identities in Brazil; this focus allows her to explore how uneven patterns of economic development are consolidated and understood. Organized around two principal episodes—the 1932 Constitutionalist Revolution and 1954’s IV Centenário, the quadricentennial of São Paulo’s founding—this book shows how both elites and popular sectors in São Paulo embraced a regional identity that emphasized their European origins and aptitude for modernity and progress, attributes that became—and remain—associated with “whiteness.” This racialized regionalism naturalized and reproduced regional inequalities, as São Paulo became synonymous with prosperity while Brazil’s Northeast, a region plagued by drought and poverty, came to represent backwardness and São Paulo’s racial “Other.” This view of regional difference, Weinstein argues, led to development policies that exacerbated these inequalities and impeded democratization.

[\*Music, Race, and Nation\*](#) Apr 06 2021 Long a favorite on dance floors in Latin America, the porro, cumbia, and vallenato styles that make up Colombia's música tropical are now enjoying international success. How did this music—which has its roots in a black, marginal region of the country—manage, from the 1940s onward, to become so popular in a nation that had prided itself on its white heritage? Peter Wade explores the history of música tropical, analyzing its rise in the context of the development of the broadcast media, rapid urbanization, and regional struggles for power. Using archival sources and oral histories, Wade shows how big band renditions of cumbia and porro in the 1940s and 1950s suggested both old traditions and new liberties, especially for women, speaking to a deeply rooted image of black music as sensuous. Recently, nostalgic, "whitened" versions of música tropical have gained popularity as part of government-sponsored multiculturalism. Wade's fresh look at the way music transforms and is transformed by ideologies of race, nation, sexuality, tradition, and modernity is the first book-length study of Colombian popular music.
