General description and photographic survey of all aspects of life in the Northwest Territories and Yukon. A descriptive account of the Flacourtiaceae native and naturalised in Kenya, Tanzania and Uganda, together with information on exotic ornamental and crop plants. At least one species per genus is illustrated, and the bibliography and synonymy are sufficiently detailed to explain the nomenclature and taxonomic circumscriptions within a broad regional context. Microfinance in India: A State of the Sector Report, 2007 is one in a series of annual reports on the microfinance sector in India. It is a comprehensive one-stop document that provides a holistic view of the sector, providing a detailed analysis of its status and future. It highlights recent developments under each of the two main models of microfinance in India -the SHG and MFI models. Most significantly, it engages with issues of topical interest such as the microfinance bill pending in parliament in a balanced and objective manner, and focuses on policy issues that need the attention of decision makers. The book carries a statistical appendix which provides essential data on the sector, and strengthens its utility as a reference document. It will be of interest to various players in the sector including practitioners, bankers, insurance companies, venture capitalists, regulators, donors and academics. Few events in America's colonial history have spurred as much interest as English General Edward Braddock's ill-fated expedition from Fort Cumberland in Western Maryland to Fort Duquesne during the French and Indian war in 1755. Famously accompanied by Virginia militia Colonel George Washington, Braddock's forces struggled over a harried and difficult route that has been mapped and studied many times in the centuries since. Early maps exist in the British Archives and major interpretations comparing these maps to features on the ground were written in 1847 and 1908. Despite this intense and continuous study, some questions still remain - including a question raised in this book by history author Lannie Dietle. As in his other works about colonial roads along the Allegheny Front, Mr. Dietle conducted an exhaustive study, not only of Braddock's route, but extensive history of Nemacolin's Trail and the Ohio Company Road through this same region. The fascinating alternative theory presented here involves the route between Braddock's first and second camps, ending with his arrival at a mysterious, now lost, location called Martin's Plantation. This book presents significant and harmonious evidence that Braddock did not turn southwest at the confluence of Porter Run and Braddock Run, but instead followed the existing Ohio Company Road through an area later known as Eckhart Mines. This theory continues, drawn from the same sources, that Martin's Plantation was located west of George's Creek, not to the east of the drainage as previous authors have surmised. The evidence thoughtfully presented here is already stimulating new efforts by other Braddock scholars and hobbyists to begin a new search for evidence on the ground of a more northerly route to Martin's - which could lead to a major revision in this historic narrative of George Washington's only military service with a regular British army unit. This booklet explains the benefits of Universal Housing Design and how they can be achieved. It is designed to assist Builders & Developers, Designers & Architects, Landlords, Lecturers, Home owners or renovators, Housing professionals and Students. Universal Housing Design is a practical and modern approach to home design, construction and renovation to provide a design that is useful and appealing to people with diverse abilities. Includes a section outlining the seven principles of Universal Design. A cursed prince sits alone in a secluded castle. Few have seen him, but those who claim they have say his hair is wild and nails are sharp—like a beast's! But how did this prince, once jovial and beloved by the people, come to be a reclusive and bitter monster? And is it possible that he can ever find true love and break the curse that has been placed upon him? Fort Cumberland: The Missing Years breaks new ground in understanding the years between the end of the French and Indian War and the founding of the city of Cumberland, Maryland in 1786. Lannie Dietle's incisive understanding of early European exploration of the Allegheny region is certain to expand any reader's knowledge of transportation patterns, military movements and early commercial initiatives in the Mid Atlantic colonies of Maryland, Virginia and Pennsylvania. This book is extensively footnoted from original source materials and makes use of original maps and diagrams of America's first western frontier. Microfinance in developing countries is a collection of studies by leading researchers in the field of microfinance. It discusses key issues that the rapidly growing microfinance industry currently faces, and offers interesting views and analysis of topical matters concerning the microfinance realm. This comprehensive guide to wetland weeds covers both native and introduced species, ranging from minor or localised environmental problems to those that should not be tolerated in any situation. The author takes a pragmatic approach to weed control, recognising that some weeds may not be possible to eradicate, and emphasising the need to assess the extent and future potential of any infestation before taking action. Weed control should be planned in the context of the overall management goals for any type of wetland, the types of habitat weeds provide or overrun, and whether they can be replaced successfully with more appropriate plants. A range of strategies for controlling wetland weeds are considered, from containment actions to prevent the development of a soil seed bank to physical removal, and biological approaches from biocontrol to shading, overplanting and use of turbidity. The widespread use of chemical controls is also discussed, with the warning that these are often only a short-term cure and can cause more harm to aquatic ecosystems than the weeds they are holding at bay. More than 130 species of established weeds are included with information on their origins, nutrient responses, environmental effects, habitat values, prospects for containment or eradication, and even culinary uses. Other sections look at native plants as weeds, including a number of species of uncertain origins, and potential weeds still being legally sold through the aquarium and nursery trades. Chronicles the stand-alone adventures and exploits of the clerics in the Forgotten Realms universe. Contains fifteen stories by Elaine Cunningham about the Forgotten Realms. In the Indian context. A comprehensive native plant identification guide covering the diverse habitats of South East Queensland and Northern NSW. MANGROVES TO MOUNTAINS is a comprehensive native plant identification guide covering the diverse habitats of South East Queensland and Northern NSW. This revised edition covers more than 2,200 species of plants with accompanying full colour photographs, making it an easy to use, in the field tool for the identifying the region's wonderful array of native flora. What if Belle's mother cursed the Beast? As Old as Time is the third book in a new YA line that reimagines classic Disney stories in surprising new ways. When Belle touches the Beast's enchanted rose, memories flood through Belle's mind—memories of a mother she thought she would never see again. And, stranger still, she sees that her mother is none other than the beautiful enchantress who cursed the castle and all its inhabitants. Shocked and confused, Belle and the Beast will have to unravel a dark mystery about their families that is 21 years in the making. If you want to build your own fireplace, or your own cabin in the woods with its wood-burning fireplaces, this book contains cabin plans and detailed instructions you will need. Written for the novice, it not only tells about cabins and fireplaces and how to build them, but about back garden fireplaces, designs for rustic furniture, out-door cooking menus, gateways, guard-rails and fences. It is filled with philosophy and wisdom on living in the out-of-doors. Meinecke was a well-known master cabin builder and do-it-yourself man. He not only wrote the book, but he printed the original edition himself on a small press in his own home and bound it in craft cloth laced together with stout cord. Still considered a classic

work. The 50th anniversary edition of this classic work on the art of Northwest Coast Indians now offers color illustrations for a new generation of readers along with reflections from contemporary Northwest Coast artists about the impact of this book. The masterworks of Northwest Coast Native artists are admired today as among the great achievements of the world's artists. The painted and carved wooden screens, chests and boxes, rattles, crest hats, and other artworks display the complex and sophisticated northern Northwest Coast style of art that is the visual language used to illustrate inherited crests and tell family stories. In the 1950s Bill Holm, a graduate student of Dr. Erna Gunther, former Director of the Burke Museum, began a systematic study of northern Northwest Coast art. In 1965, after studying hundreds of bentwood boxes and chests, he published Northwest Coast Indian Art: An Analysis of Form. This book is a foundational reference on northern Northwest Coast Native art. Through his careful studies, Bill Holm described this visual language using new terminology that has become part of the established vocabulary that allows us to talk about works like these and understand changes in style both through time and between individual artists' styles. Holm examines how these pieces, although varied in origin, material, size, and purpose, are related to a surprising degree in the organization and form of their two-dimensional surface decoration. The author presents an incisive analysis of the use of color, line, and texture; the organization of space; and such typical forms as ovoids, eyelids, U forms, and hands and feet. The evidence upon which he bases his conclusions constitutes a repository of valuable information for all succeeding researchers in the field. Microfinance india: state of the Sector Report is a series of annual reports on the microfinance sector in India. The Report seeks to document developments, clarify issues, publicise studies, stimulate research, identify policy choices, generate understanding and enhance support for the sector. It is a comprehensive one-stop document that provides the latest data and a holistic view of the sector, combines analysis and description and integrates a variety of topics hitherto treated piecemeal. The Report highlights recent developments in Self Help Groups (SHGs) and SHB-Bank Linkage Programmes (SBLPs), and focuses on microfinance with regard to the investment scenario in India. It also deals with the burgeoning field of urban microfinance, developments in micro-insurance and the impact of new technologies on the microfinance sector. Additionally, it recognizes the high demands which the state makes on microfinance institutions and discusses the need and relevance of new policy regulations. Complementing these analyses, statistical annexures provide essential data on the sector, strengthening its utility as a reference document. It contains extensive original material, yet draws widely on the findings of other recent studies and reports, thereby providing a complete, detailed analysis of the status and the future of microfinance. A Revised And Enlarged Listing Of Approved Scientific And Common Names Of Plants And Plant Products In American Commerce Or Use. The Beauty and the Beast legend has a universal appeal; the tale exists in numerous versions throughout the world. After all of its ups and downs, Disney's Beauty and the Beast was released in 1991 to rave reviews and record-breaking business. The film was widely hailed as a technical and aesthetic breakthrough. It was the first of only three animated features ever to be nominated for an Oscar for Best Picture. Its success has since spun into a smash Broadway musical adaptation, intricately detailed environments at Walt Disney World, and soon a live-action movie musical directed by Bill Condon. This authoritative book features interviews with artists, producers, directors, writers, actors, and more from the various beloved installments-making it a treasure trove of delights for fans of the tale as old as time. Everything a player needs to adventure in the Forgotten Realms, the most popular setting in the D&D "RM" game can be found right here: history, maps, non-player characters, geography, economics, societies, organizations, religions, politics, monsters, magic items, spells ... even a start-up adventure in the Realms! Presents a collection of tales from previous anthologies by Ed Greenwood along with three new works set in the magical land of Faerun. There is perhaps no facet of modern society where the influence of computer automation has not been felt. Flight management systems for pilots, diagnostic and surgical aids for physicians, navigational displays for drivers, and decision-aiding systems for air-traffic controllers, represent only a few of the numerous domains in which powerful new automation technologies have been introduced. The benefits that have been reaped from this technological revolution have been many. At the same time, automation has not always worked as planned by designers, and many problems have arisen--from minor inefficiencies of operation to large-scale, catastrophic accidents. Understanding how humans interact with automation is vital for the successful design of new automated systems that are both safe and efficient. The influence of automation technology on human performance has often been investigated in a fragmentary, isolated manner, with investigators conducting disconnected studies in different domains. There has been little contact between these endeavors, although principles gleaned from one domain may have implications for another. Also, with a few exceptions, the research has tended to be empirical and only theory-driven. In recent years, however, various groups of investigators have begun to examine human performance in automated systems in general and to develop theories of human interaction with automation technology. This book presents the current theories and assesses the impact of automation on different aspects of human performance. Both basic and applied research is presented to highlight the general principles of human-computer interaction in several domains where automation technologies are widely implemented. The major premise is that a broad-based, theory-driven approach will have significant implications for the effective design of both current and future automation technologies. This volume will be of considerable value to researchers in human Annotation This is the first book to give a comprehensive overview of the new field of housing microfinance practice worldwide. The expert contributors provide guidance to practitioners and policymakers on what works best, and look at the applicability of developing world experience of housing microfinance in the United States. The book takes experience from the separate fields of housing policy and microfinance and explores what each can learn from the other. The contributors review the important issues for microfinance institutions which are considering expanding into housing, or providers of conventional housing loans who seek to offer products for poor clients who lack collateral or a regular salary income. Although there are differences between the low-income housing market in the United States and in developing countries, the book explores lessons from international experience that can be applied domestically. With lessons for both housing policymakers and housing microfinance practitioners, this will be a crucial book in putting the new field of housing microfinance on the map. "This Metropolitan Plan is an integrated, long-term planning framework that will sustainably manage Sydney's growth and strengthen its economic development to 2036 while enhancing its unique lifestyle, heritage and environment. It builds on the 2005 Metropolitan Strategy's 'city of cities' approach and will transform Sydney from a single-centred city to a more connected with many centres and improved accessibility."--Home page, Metropolitan Plan for Sydney 2036. The third reader in the set continues spelling exercises in the first half and introduces definitions in the latter half of the book.
