IN the extensive literature of Theosophy this little work stands out for certain specially marked characteristics. It records an attempt to describe the Invisible World in the same manner that a botanist would describe some new territory on this globe not explored by any previous botanist. Most works dealing with Mysticism and Occultism are characterised by the lack of a scientific presentation, such as is exacted in every department of science. They give

us far more the significance of things, rather than descriptions of the things themselves. In this little book the author approaches the Invisible World from the modern standpoint of science. The first point which it is necessary to make clear in describing this astral plane is its absolute reality. In using that word I am not speaking from that metaphysical standpoint from which all but the One Unmanifested is unreal because impermanent; I am using the word in its plain, every-day sense, and I mean by it that the objects and inhabitants of the astral plane are real in exactly the same way as our own bodies, our furniture, our houses or monuments are real - as real as Charing Cross, to quote an expressive remark from one of the earliest Theosophical works. They will no more endure for ever than will objects on the physical plane, but they are nevertheless realities from our point of view while they last - realities which we cannot afford to ignore merely because the majority of mankind is as yet unconscious, or but vaguely conscious, of their existence. Is this world all that exists, or are there one or more invisible dimensions in the universe that also harbor sentient beings? In *The Astral Plane: Its Scenery, Inhabitants and Phenomena*, esoterica expert C.W. Leadbeater brings together centuries of information about one much-hypothesized-about realm, the so-called astral plane. Whether you are a believer in unseen phenomenon or a skeptic, it makes for a fascinating read.

Written by well-

known motorcycle and automotive author Doug Mitchel, *How to Build a Café Racer* starts with a history lesson. While those first bikes were built in the UK for racing from cafe to cafe, the current rage for Cafe Racers has definitely spread to the US. Converting a stock motorcycle to a Cafe Racer requires more than a fairing and a few decals. The book starts with chapters on planning and choosing an appropriate bike, followed by chapters that detail the modifications that will likely be embraced by anyone converting a stocker to a rocker. From shocks and tires to engine modifications, Doug's book lays out each type of modification and how it's best carried through. The center of the book holds a gallery of finished bikes. These are not just Triumphs or Nortons, but nearly every brand imaginable from Japan, Italy, the UK, and Germany. The final chapters include two, start-to-finish cafe builds. This is the chance for the reader to see how professional shops take a stock Honda, Triumph, or Ducati and convert it into a fast, sexy, and functional Cafe Racer, ready to race from cafe to cafe on Saturday night, or around the race track on Sunday afternoon. The complete story of the legenday Honda V4 motorcycles and the four-stroke engine design that gave them the name. Including full production histories, comprehensive specification details and over 250 colour illustration, the book covers design and development of the first Honda V4, the oval piston NR500, and the VF road models from 1982-1988. Also covered: the iconic sport touring bikes, the VFR750, VFR800 and VFR1200F; the worldwide racing success for Honda Racing Corporation's RC30; the 1990 Pan European/ST1100, with its longitudinal V4 engine, and the 2002 ST1300; Honda V4s in MotoGP; details of the 2014 VFR800 and CTX1300 cruiser and finally, owners' experiences and insight from those who worked in the industry. Fully illustrated with 256 colour photographs and comprehensive specification details. Covers: TRX400EX Fourtrax (1999-2000) TRX400EX Sportrax (2001-2014) "[The Breaking Point] suggests that the national conversation is about to have a hot flash. The passage through middle age of so large a clump of women . . . guarantees that some rules may have to be rewritten and boundaries moved to accommodate them." -Time magazine From the cover of Time to Desperate Housewives, the phenomenon of women in midlife experiencing a period of tumultuous personal upheaval-a breaking point-

has reached a peak in our culture. Today, more than 15 million baby boomer women report having a midlife crisis compared to 14 million men. In *The Breaking Point*, Wall Street Journal columnist Sue Shellenbarger looks beyond the numbers to discover the root of all this angst and examine the ways, both successful and not, that women are navigating this crucial transition period. Drawing on original research data and interviews with more than fifty women, *The Breaking Point* uses real-life stories to illustrate the different archetypes and modes the course of reinvention follows. The book also shows women how to avoid the pitfalls of a midlife meltdown—ruined relationships and jettisoned careers—and instead transform this turbulent time into a period of personal growth that will enrich the rest of their lives. Once every decade or so a book comes along that defines the collective experience of an entire generation. Provocative, insightful, and resonant, *The Breaking Point* is just such a book. "Every once in a while you read a book that transforms you. Like the shift of a kaleidoscope, it reconfigures your view of life's journey. This is such a book. It may stimulate you to change directions, perhaps even enable you to find life's greatest joy: fulfillment. An invigorating read." —Helen Fisher, author of *Why We Love* "This catchy work is tailor-made for the 36 percent of women who will eventually have what they regard as midlife crises' . . . an illuminating guide." —Publishers Weekly This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the

solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality... Haynes has discovered all the problems that motorcycle owners could possibly encounter when rebuilding or repairing their bikes.
