**Why?** Jun 24 2020 Offers questions and answers about topics including why cats' eyes shine in the dark, why the sky is blue, why peaches are fuzzy, how bees make honey, why soap is slippery, and why some people bring their own bags to the supermarket.

**The Why's of Economics** Sep 08 2021 About the book: What happens when we print excess money? How does inflation depress our savings in the banks? How do commercial banks advance out loans to households and corporates? Will the rise of AI, ML, and Robotics make humans obsolete? What about china's supremacy in trade? How do governments and central banks regulate the economy in unprecedented times? And what about immigration? Few of the many questions that are often raised in economics have been answered in this short book. The book comes with few jargons that have been explained and demystifies the concepts that always keep bugging our minds. The book instigates many innovative examples to try and relate to the present environment to make the book much more engaging. About the author: Nirav Shedge is an economics student with research interests in macroeconomic policies and international trade. Over the course of two years, he has written several articles on economic issues and frequently publishes research papers in journals. He likes thinking about economic policies and wishes to research more in this area. Nirav is also a sports enthusiast and has represented Maharashtra state for the Netball championship.

**Learning in the Cloud** Mar 22 2020 This comprehensive and cutting-edge book portrays a vision of how digital media can help transform schools, and what kinds of curriculum pedagogy, assessment, infrastructure, and learning environments are necessary for the transformation to take place. The author and his research team spent thousands of hours observing classes and interviewing teachers and students in both successful and unsuccessful technology-rich schools throughout the United States and other countries. Featuring lessons learned as well as analysis of the most up-to-date research, they offer a welcome response to simplistic approaches that either deny the potential of technology or exaggerate its ability to reform education simply by its presence in schools. Challenging conventional wisdom about technology and education, *Learning in the Cloud*: critically examines concepts such as the "digital divide," "21st-century skills," and "guide on the side" for assessing and guiding efforts to improve schools; combines a compelling vision of technology's potential to transform learning with an insightful analysis of the curricular challenges required for meaningful change; and discusses the most recent trends in media and learning, such as the potential of tablets and e-reading.

The How and Why of One Variable Calculus Apr 15 2022 First course calculus texts have traditionally been either "engineering/science-oriented" with too little rigor, or have thrown students in the deep end with a rigorous analysis text. *The How and Why of One Variable Calculus* closes this gap in providing a rigorous treatment that takes an original and valuable approach between calculus and analysis. Logically organized and

also very clear and user-friendly, it covers 6 main topics; real numbers, sequences, continuity, differentiation, integration, and series. It is primarily concerned with developing an understanding of the tools of calculus. The author presents numerous examples and exercises that illustrate how the techniques of calculus have universal application. *The How and Why of One Variable Calculus* presents an excellent text for a first course in calculus for students in the mathematical sciences, statistics and analytics, as well as a text for a bridge course between single and multi-variable calculus as well as between single variable calculus and upper level theory courses for math majors.

Military Blunders Mar 14 2022 Retelling the most spectacular cock-ups in military history, this graphic account has a great deal to say about the psychology of military incompetence and the reasons even the most well-oiled military machines inflict disaster upon themselves. Beginning in AD 9 with the massacre of Varus and his legions in the Black Forest all the way up to present day conflict in Afghanistan it analyses why things go wrong on the battlefield and who is to blame.

**The Book of Why** Jan 24 2023 A pioneer of artificial intelligence shows how the study of causality revolutionized science and the world 'Correlation does not imply causation.' This mantra was invoked by scientists for decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to

explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, *The Book of Why* explains how we can think better.

*The Case for Books* Nov 29 2020 The era of the printed book is at a crossroad. E-readers are flooding the market, books are available to read on cell phones, and companies such as Google, Amazon, and Apple are competing to command near monopolistic positions as sellers and dispensers of digital information. Already, more books have been scanned and digitized than were housed in the great library in Alexandria. Is the printed book resilient enough to survive the digital revolution, or will it become obsolete? In this lasting collection of essays, Robert Darnton—an intellectual pioneer in the field of this history of the book—lends unique authority to the life, role, and legacy of the book in society.

Live Sports Media Jul 06 2021 In *Live Sports Media: The What, How and Why of Sports Broadcasting*, Dennis Deninger provides an all-encompassing view of the sports television industry from his own perspective as an Emmy Award-winning producer at ESPN, at a time of seismic shifts in the industry. Technological advances and the proliferation of sports content across multiple media platforms have increased accessibility to sports events of all kinds across the world. Shifts in viewing habits and audience preferences are changing the dynamic of sports media and the sports industry as a whole. The result: more power for some sectors and diminished power for many others, to which professionals in the field need to rapidly adapt. This second edition has been substantially updated to explore the impact of COVID-19 disruptions on sports and the growth of women's sports broadcasting and evolving sports, as well as political statements made in sports: Black Lives Matter, and "taking a knee." It illustrates the origins, impact, reach, economics, production, and presentation of sports on video media – including, but not limited to, television. It takes the reader behind the scenes to describe the forces and processes that have shaped and continue to change sports content, its delivery, and how it connects with fans. Dennis Deninger draws from his

experiences as an expert in the industry to expose how the choices and decisions that are now being made affect the programming, content, storytelling, production, advertising, and delivery of the sports broadcasting that we will see next season and how it will evolve in the years to come. This practical, entertaining book provides insights into sports broadcasting that sports management, media, and journalism students and learning practitioners will not find anywhere else.

**Find Your Why** Feb 01 2021 Start With Why has led millions of readers to rethink everything they do – in their personal lives, their careers and their organizations. Now Find Your Why picks up where Start With Why left off. It shows you how to apply Simon Sinek’s powerful insights so that you can find more inspiration at work -- and in turn inspire those around you. I believe fulfillment is a right and not a privilege. We are all entitled to wake up in the morning inspired to go to work, feel safe when we’re there and return home fulfilled at the end of the day. Achieving that fulfillment starts with understanding exactly WHY we do what we do. As Start With Why has spread around the world, countless readers have asked me the same question: How can I apply Start With Why to my career, team, company or nonprofit? Along with two of my colleagues, Peter Docker and David Mead, I created this hands-on, step-by-step guide to help you find your WHY. With detailed exercises, illustrations, and action steps for every stage of the process, Find Your Why can help you address many important concerns, including: \* What if my WHY sounds just like my competitor’s? \* Can I have more than one WHY? \* If my work doesn’t match my WHY, what should I do? \* What if my team can’t agree on our WHY? Whether you've just started your first job, are leading a team, or are CEO of your own company, the exercises in this book will help guide you on a path to long-term success and fulfillment, for both you and your colleagues. Thank you for joining us as we work together to build a world in which more people start with WHY. Inspire on! -- Simon

**The Why of Things** Sep 20 2022 Why was there a meltdown at the Fukushima power plant? Why do some people get cancer and not others? Why is global warming happening? Why does one person get depressed in the face of life's vicissitudes while another finds resilience? Questions like these—questions of causality—form the basis of modern scientific inquiry, posing profound intellectual and methodological challenges for researchers in the physical, natural, biomedical, and social sciences. In this groundbreaking book, noted psychiatrist and author Peter Rabins offers a conceptual framework for analyzing daunting questions of causality. Navigating a lively intellectual voyage between the shoals of strict reductionism and relativism, Rabins maps a three-facet model of causality and applies it to a variety of questions in science, medicine, economics, and more. Throughout this book, Rabins situates his argument within relevant

scientific contexts, such as quantum mechanics, cybernetics, chaos theory, and epigenetics. A renowned communicator of complex concepts and scientific ideas, Rabins helps readers stretch their minds beyond the realm of popular literary tipping points, blinks, and freakonomic explanations of the world.

**The Case against Education** Sep 27 2020 Why we need to stop wasting public funds on education Despite being immensely popular—and immensely lucrative—education is grossly overrated. Now with a new afterword by Bryan Caplan, this explosive book argues that the primary function of education is not to enhance students' skills but to signal the qualities of a good employee. Learn why students hunt for easy As only to forget most of what they learn after the final exam, why decades of growing access to education have not resulted in better jobs for average workers, how employers reward workers for costly schooling they rarely ever use, and why cutting education spending is the best remedy. Romantic notions about education being "good for the soul" must yield to careful research and common sense—The Case against Education points the way.

**The Neurocognitive Theory of Dreaming** Jul 26 2020 A comprehensive neurocognitive theory of dreaming based on the theories, methodologies, and findings of cognitive neuroscience and the psychological sciences. G. William Domhoff's neurocognitive theory of dreaming is the only theory of dreaming that makes full use of the new neuroimaging findings on all forms of spontaneous thought and shows how well they explain the results of rigorous quantitative studies of dream content. Domhoff identifies five separate issues—neural substrates, cognitive processes, the psychological meaning of dream content, evolutionarily adaptive functions, and historically invented cultural uses—and then explores how they are intertwined. He also discusses the degree to which there is symbolism in dreams, the development of dreaming in children, and

the relative frequency of emotions in the dreams of children and adults. During dreaming, the neural substrates that support waking sensory input, task-oriented thinking, and movement are relatively deactivated. Domhoff presents the conditions that have to be fulfilled before dreaming can occur spontaneously. He describes the specific cognitive processes supported by the neural substrate of dreaming and then looks at dream reports of research participants. The “why” of dreaming, he says, may be the most counterintuitive outcome of empirical dream research. Though the question is usually framed in terms of adaptation, there is no positive evidence for an adaptive theory of dreaming. Research by anthropologists, historians, and comparative religion scholars, however, suggests that dreaming has psychological and cultural uses, with the most important of these found in religious ceremonies and healing practices. Finally, he offers suggestions for how future dream studies might take advantage of new technologies, including smart phones.

This Dangerous Book May 24 2020 From Steve and Jackie Green, founders and curators of the Museum of the Bible--a fascinating exploration of the history, authenticity, and power of the Bible, the book that has changed people and nations throughout the centuries. It is the top selling book in history. It brings social upheaval, international arguments, and political controversy. It has been used to justify both love and war. And for generations, it has found its way into the hearts of millions, offering comfort, direction, and life-changing truths. How could one book have such power? In *This Dangerous Book*, Steve and Jackie Green explore the incredible history and impact of the Bible. As the founders and visionaries of the Museum of the Bible in Washington D.C., the Greens have a unique perspective on the Bible's journey--from its ancient beginnings, to its effect on the moral fiber of nations, to its transformative influence in individual hearts. The Greens share the challenges they have faced in acquiring biblical artifacts from around the world and why generations--in every time period and in every geographical location--have risked their lives to preserve this precious book. Exploring ancient tablets, medieval commentaries, and modern translations, *This Dangerous Book* offers fascinating insight into the miracles and martyrdoms that have led to the Scriptures we read today. The Greens explore how cutting-edge technology gives new insight into the authenticity of the Bible, including the work of fifty scholars who recently uncovered hidden details about thirteen unpublished Dead Sea Scroll fragments. *This Dangerous Book* also looks at the link between the Hebrew Bible and the New Testament, what we can learn from how the Bible was passed down to us, and why God's Word is foundational to America's past and crucial for its future. The Bible is a world-changer and a heart-changer. Whether you have read the Bible for years or are simply curious about its influence, *This Dangerous Book* could change your heart as well.

**Gateway to Judaism** Oct 09 2021 *Gateway to Judaism* is an insider's engaging look at the mindset, values, and practices of Judaism in the 21st century. As a senior lecturer and outreach expert with Gateways Seminars, Rabbi Mordechai Becher has helped thousands of people reconnect with the beauty, wisdom and

relevance of their Jewish heritage. Often asked to recommend "just one book" that would explain the essentials of Jewish life and thought, he decided to write it himself! Delving beneath common perceptions of Jewish tradition, Rabbi Becher presents fresh and meaningful perspectives that will educate and inspire you. Among the many intriguing topics he addresses are: Is there spirituality in Judaism? In our age of labor-saving devices, do we still need a Sabbath? What is Judaism's view on death and the afterlife? Why is Judaism so full of laws? Why should I pray? Does God really want to hear my complaints? Can Judaism enhance my marriage? Isn't circumcision just an ancient rite of initiation? Is it still relevant? Why is Israel so central to Judaism? Does a religion need a land? Why does a mourner say Kaddish? Wasn't keeping kosher a health measure? Does it still have a purpose today? How can I add meaning to my Passover Seder? Gateway to Judaism reveals Judaism's power to elevate your life. Whether you are new to Jewish tradition, familiar with its practice, or simply curious, you will find this book an illuminating guide to a joyous and fulfilling lifestyle. -- from dust cover.

**Who Gets In and Why** May 16 2022 From award-winning higher education journalist and New York Times bestselling author Jeffrey Selingo comes a revealing look from inside the admissions office—one that identifies surprising strategies that will aid in the college search. Getting into a top-ranked college has never seemed more impossible, with acceptance rates at some elite universities dipping into the single digits. In **Who Gets In and Why**, journalist and higher education expert Jeffrey Selingo dispels entrenched notions of how to compete and win at the admissions game, and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a “good college.” Hint: it’s not all about the sticker on the car window. Selingo, who was embedded in three different admissions offices—a selective private university, a leading liberal arts college, and a flagship public campus—closely observed gatekeepers as they made their often agonizing and sometimes life-changing decisions. He also followed select students and their parents, and he traveled around the country meeting with high school counselors, marketers, behind-the-scenes consultants, and college rankers. While many have long believed that admissions is merit-based, rewarding the best students, **Who Gets In and Why** presents a more complicated truth, showing that “who gets in” is frequently more about the college’s agenda than the applicant. In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions, admissions officers often make split-second decisions based on a variety of factors—like diversity, money, and, ultimately, whether a student will enroll if accepted. One of the most insightful books ever about “getting in” and what higher education has become, **Who Gets In and Why** not only provides an unusually intimate look at how admissions decisions get made, but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests.

**Start with Why** Nov 22 2022 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the

most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.
