Toward Peace in Bosnia Dec 31 2022 Cousens (director of research, International Peace Academy) and Cater (researcher, International Peace Academy) consider the limitations of the Dayton accords and their failure to produce peace, political reform, democracy, multiculturalism, and economic development in Bosnia. They consider internat

No More Heroes Sep 15 2021 Missionaries of the left, saviors are people of privilege who believe they have all the answers. They want to help, but don't want to listen; they lead but never follow. From post-Katrina New Orleans, to anti-sex-trafficking work, to do-gooder journalists, Flaherty's book reveals saviors' misdeeds but also shows how activists can build new, stronger movements.

Lawlessness and Economics Sep 03 2020 In Shakespeare's Henry VI Part 2, a member of John Cade's gang famously suggests that the rebels should, as an initial step toward utopia, "Kill all the lawyers." Certainly, anyone who has forked over a hefty retainer can sympathize, but can societies function without legal systems? And if so, how? The answer, according to Princeton economist Avinash Dixit, is that they can indeed function and have for thousand of years, provided the right kinds of social institutions are in place. In fact, lawless systems can work better than traditional justice systems for some small, homogenous groups. Thus, extralegal institutions are still common, from trade associations that arbitrate members' disputes to private security guards. While this slim book is thick with equations, getAbstract thinks it gives a nice overview of the empirical literature. The game-theory models yield a few surprising conclusions and many areas for further research. While killing all the lawyers still is probably not prudent, Dixit begins to show when quasi-legal institutions lubricate and when they gum up the wheels of commerce.

Calculating Promises Apr 22 2022 This book is a history of American contract law around the turn of the twentieth century. It meticulously details shifts in our conception of contract by juxtaposing scholarly accounts of contract with case law, and shows how the cases exhibit conflicts for which scholarship offers just one of many possible answers. Breaking with conventional wisdom, the author argues that our current understanding of contract is not the outgrowth of gradual refinements of a centuries-old idea. Rather, contract as we now know it was shaped by a revolution in private law undertaken toward the end of the nineteenth century, when legal scholars established calculating promisors as the centerpiece of their notion of contract. The author maintains that the revolution in contract thinking is best understood in a frame of reference wider than the rules governing the formation and enforcement of contracts. That frame of reference is a cultural negotiation over the nature of the individual subject and the role of the individual in a society undergoing transformation. Areas of central concern include the enforceability of promises to make gifts; the relationship of contracts to speculation and gambling; and the problem of incomplete contracts.

A Bitter Peace Sep 27 2022 Exploring the diplomatic effort to end the Vietnam War, Asselin shows that the Paris Peace Agreement of 1973 was doomed to unravel.

The North American Free Trade Agreement Apr 10 2021 In this volume, George Grayson illuminates the campaign for and against the agreement, leading to the crucial, fingernail-biting vote in the House of Representatives in November 1993.

Minutes of the ... Session of the Mississippi Annual Conference of the Methodist Protestant Church Apr 03 2023

The Syntax of Agreement and Concord Aug 03 2020 'Agreement' is the grammatical phenomenon in which the form of one item, such as the noun 'horses', forces a second item in the sentence, such as the verb 'gallop', to appear in a particular form, i.e. 'gallop' must agree with 'horses' in number. Even though agreement phenomena are some of the most familiar and well-studied aspects of grammar, there are certain basic questions that have rarely been asked, let alone answered. This book develops a theory of the agreement processes found in language, and considers why verbs agree with subjects in person, adjectives agree in

number and gender but not person, and nouns do not agree at all. Explaining these differences leads to a theory that can be applied to all parts of speech and to all languages.

Agreement and the Stability of Democracy Oct 05 2020

WTO negotiations on agriculture and developing countries May 31 2020 The World Trade Organization's Doha Round of trade talks has been plagued by a lack of concrete progress toward establishing a fair and harmonious agricultural trading system. Because the results of the Doha Round could have far-reaching implications for the trade and economic prospects of developing countries in the twenty-first century, it is critical for these countries to fully understand the issues involved in the negotiations on agriculture. However, there has been no authoritative analysis of the rules and modalities on which governments of developing countries can rely. This book, coauthored by an insider to the trade talks that led to the establishment of the WTO, fills this gap. The volume begins with a detailed analysis of the provisions of the WTO's Agreement on Agriculture and the modalities of the negotiations. It examines the implementation experience of key members of the WTO, then traces the developments in the negotiations up to the recent impasse. In light of these considerations, and on the basis of a case study of India, the authors propose various elements of a negotiating position and strategy for developing countries. The authors offer tough but realistic recommendations regarding tariffs, market access, treatment of sensitive or special products, and other aspects of international trade. This book will be of particular interest to researchers and practitioners as well as students seeking in-depth knowledge of the recent history of agricultural trade talks.

Shaping College Football May 12 2021 Shaping College Football is the story of the intercollegiate gridiron sport in the years immediately after World War I when the game underwent major changes that transformed it into one of America's major sporting attractions and a commercial entity that would be recognizable to any twenty-first century fan. Raymond Schmidt examines the many factors that were a part of college football's reshaping in the 1920s as the universities became dependent upon the revenue being generated by football, and the sport increasingly became identified as a commercialized, big business activity; all of it being played out against a backdrop of struggle between the academic and athletic factions over control of intercollegiate sport's place in the lives of the students and the university community. This is the most detailed examination ever undertaken of college football's "Golden Era," and the topics discussed range from the shift of power away from the game's pioneering schools, through the real evolution of forward passing, to stadium building and the decade-long struggle over the game's growing over-emphasis that culminated in the legendary Carnegie Report of 1929. Including chapters on college football's class-oriented opposition to professional football during the decade, the rise of the sport at the Catholic colleges and the historically Black colleges, and some of the major scandals and disputes involving the universities, Shaping College Football also contributes to the study of sport and culture

American Literary Realism and the Failed Promise of Contract Apr 30 2020 "Moving expertly from legal analysis to social history to profoundly recontextualized literary critique, Thomas shows how writers like Twain, James, Howells, and Chopin took up contract as a model, formally and thematically evoking its possibilities and dramatizing its failures.

The New Sovereignty Nov 05 2020 States resort to regulatory agreements to address problems as disparate as nuclear proliferation, international trade, species destruction, and intellectual property, while threatening military or economic sanctions in order to deter noncompliance. This book argues that this approach is misconceived, and proposes a new model of treaty compliance.

To Agree Or Not to Agree Jan 20 2022 DIVE Explains why, despite the fierce rivalry of the Cold War, Russians and Americans could negotiate arms control agreements /div

The Watchman Feb 27 2020

Integrity and Agreement Nov 29 2022 "Two impressive features of this book are its clarity of purpose and the breadth of disciplinary resources to which it appeals." ---Geoffrey Brennan, Professor of Economics, Australian National University "Facing massive evidence that people do not act generally as self-regarding payoff maximizers, economists have become increasingly interested in issues of cooperation, altruism, identity, and morality. Lanse Minkler's contribution is particularly important because of his powerful argument that the evidence of cooperation cannot be explained adequately by a more complicated preference function. A disposition for honesty is not simply a matter of preference---it is an issue of personal integrity, identity, and commitment. This has major implications. In particular we have to reconstruct the theory of the firm from first principles. No economist committed to the pursuit of truth should ignore this volume." ---Geoffrey Hodgson, Research Professor in Business Studies, University of Hertfordshire, United Kingdom, and Editor in Chief of the Journal of Institutional Economics "This is an interesting account of the role of integrity---preference-integrity and commitment-integrity---on economic behavior. While drawing knowledge from traditional subfields of economics, it also includes insights gleaned from psychology and philosophy, showing their effects in varied areas such as political behavior, the employment relation, religion, and human rights. In this exciting volume Lanse Minkler does an excellent job of incorporating various newer concepts of fairness and integrity into economic analysis." ---Ernst Fehr, Professor and Head of the Chair of Microeconomics and Experimental Economic Research and Director of the Institute for Empirical Research in Economics, University of Zurich Social scientists who treat humans as rational beings driven exclusively by self-interest ignore a key factor shaping human behavior: the influence of moral principles. Starting with the elementary principle "lying is wrong," economic theorist Lanse Minkler examines the ways in which a sense of morality guides real-life decision making. Whether one feels committed to specific or general moral principles, Minkler explains, integrity demands consistently acting on that commitment. Because truthfulness is the most basic moral principle, integrity means honesty. And honesty extends beyond truth-telling. It requires good faith when entering an agreement and then standing by one's word. From this premise, Minkler explores the implications of integrity for contracts between buyers and sellers and understandings between employers and employees. He also finds a role for integrity in an individual's religious vows, an elected official's accountability to constituents, and a community's obligation to human rights. Integrity and Agreement reintroduces morality as a factor for economists, sociologists, psychologists, and political scientists to consider in their efforts to comprehend human behavior. Lanse Minkler is Associate Professor of Economics at the University of Connecticut.

Cooperation In Science And Technology Oct 17 2021

Academy and College May 24 2022 This history of the origin, evolution, and demise of the Greenville Women's College (1854-1961), a small, underfunded Baptist institution in upstate South Carolina, traces its beginnings from a female academy through its organization by the South Carolina Baptist Convention, its struggle for survival and improvement during the years after the Civil War, to its rising aspirations and drive for accreditation in the 1920s. Unendowed and unable to withstand the financial turmoil of the Great Depression, it was forced to merge with nearby Furman University in the 1930s, but it endured as a coordinate college until 1961 when its students joined the men at Furman at a new coeducational campus. This book, the first history of the college, provides the missing half of Furman University's history. A social and institutional history, it focuses on Southern women's changing collegiate experience and the college's relationship to the South Carolina Baptist Convention. It emphasizes the changing nature of student life, examines the role of South Carolina Baptists in the college, and examines the impact of the accreditation movement.

Agreements for Arms Control Dec 07 2020 Generel oversigt over våbenkontrol- og nedrustningsbestræbelser samt internationale overenskomster om samme emner siden 1868. Se også "A Documentary History of Arms Control and Disarmament" af Trevor N. Dupuy og Gay M. Hammermann. Bogen er opstillet på DEPOT I-9096. SYS: 55823.

Russian Culture, Property Rights, and the Market Economy Feb 06 2021 The Russian Federation is struggling, since Perestroika and the Glasnost, in a futile attempt to become a 'normal' member in the occidental family of market economies. The attempt largely fails because corporations do not live up to Western standards of behavior, and private contracts are often not respected. What is the cause of Russia's observed difficulties? It is commonly believed that these difficulties are an expected outcome of a rocky transition from a Marxist, centrally planned system, to a market based economy. This book challenges the accepted wisdom. In tracing the history of contract and the corporation in the West, it shows that the cultural infrastructure that gave rise to these patterns of economic behavior have never taken root on Russian soil. This deep divide between Russian and Western cultures is hundreds of years old, and has little, if anything to do with the brief, seventy-year-long experimentation with overtly Marxist ideology. The transformation of Russia into a veritable market economy requires much more than an expensive and difficult transition period: it mandates a radical change in her cultural underpinnings. The book's main thesis is supported by an in-depth comparison of Western and Russian theology, philosophy, literary and artistic achievements, musical and architectural idioms and folk culture.

Moral Dealing Jun 24 2022

Journal of the ... Session of the Mississippi Annual Conference of the Methodist Episcopal Church, South Mar 02 2023

The Jewish Social Contract Jun 12 2021 This book accepts the notion that intelligent and active participation in a democratic polity is best formulated when its citizens see themselves as parties to a social contract. David Novak questions how a traditional Jew can participate in his democratic polity in good faith.

The Heavenly Contract Mar 10 2021 The idea of a heavenly contract, uniting God and humanity in a bargain of salvation, emerged as the keystone of Puritan theology in early modern England. Yet this concept, with its connotations of exchange and reciprocity, runs counter to other tenets of Calvinism, such as predestination, that were also central to Puritan thought. With bold analytic intelligence, David Zaret explores this puzzling conflict between covenant theology and pure Calvinism. In the process he demonstrates that popular beliefs and activities had tremendous influence on Puritan religion.

A User's Guide to Federal Architect-engineer Contracts Jan 08 2021 Explains the process by which the US government selects architect-engineering firms to perform design services for it, and guides the prospective contractor through the maze of requirements from finding the announcement of available contracts, almost (but not quite) to the Senate subcommittee hearings on graft. Covers how to go after a job, the proposals and negotiations leading to getting it, the administration and recording requirements after the contract is awarded, and the requirements when the project is completed. Updated to the 1995 versions of the regulations. Annotation copyright by Book News, Inc., Portland, OR

Parliamentary Debates (Hansard). Jul 02 2020

Promises, Morals, and Law Dec 27 2019 This is an analysis of the nature of promissory obligations. The subject is one which has attracted a great deal of attention among both moral and linguistic philosophers, but the book contends that much of the philosophical literature is flawed by its unreality and unfamiliarity with the serious problems that arise from the practice of promising.

From Bondage to Contract Mar 29 2020 This book explores how a generation of American thinkers and reformers - abolitionists, former slaves, feminists, labor advocates, jurists, moralists, and social scientists - drew on contract to condemn the evils of chattel slavery as well as to measure the virtues of free society. Their arguments over the meaning of slavery and freedom were grounded in changing circumstances of labor and home life on both sides of the Mason-Dixon line. At the heart of these arguments lay the problem of defining which realms of self and social existence could be rendered market commodities and which could not. From Bondage to Contract reveals how the problem of distinguishing between what was saleable and what was not reflected the ideological and social changes wrought by the concurrence of abolition in the South and burgeoning industrial capitalism in the North.

The Statutes of Nova Scotia Feb 01 2023

The Social Contract in America Mar 22 2022 The first comprehensive examination of the social contract's role in American political development. Traces the history of the contract--the closest thing we have to a common philosophy--from its role in the Founding up to current day debates, and charts its rise--and demise--in influence over American political thought.

The Design of Agreement May 04 2023 Sandra Chung proposes that linguistic theory must recognize not one but two agreement relations—a featural relation that lies behind agreement's impact on the form of words and a configurational relation that lies behind agreement's impact on syntactic structure. She identifies the two relations and argues that neither can be reduced to the other. Chung offers the most comprehensive analysis of the syntax of Chamorro that has appeared to date and relates her proposals to what is known about analogous constructions in English, Italian, Irish, Japanese, Maori, and other languages.
