American Film Criticism, from the Beginnings to Citizen Kane Jan 15 2022

Hooked May 27 2020 Pauline Kael's works have evoked either adoration or strong criticism. But few readers of the New Yorker, for which she serves as movie critic, react to Kael with indifference. Critics should consistently provoke opinion, and Kael does so without fail, as shown in this collection of her New Yorker reviews. Over the years, Kael has lost none of her bite; she is still brimming with opinions--but opinions fully supported, not simply thrown out to see how far their ripple will travel. ISBN 0-525-24705-X: \$24.95.

Narrative of a Five Years Expedition Against the Revolted Negroes of Surinam Aug 22 2022

Herman Johannes Lam (1892-1977) Apr 25 2020

Integrated Ocean Drilling Program -- U.S. Implementing Organization (IODP-USIO) May 07 2021

At Sea with the Scientifics May 19 2022 When HMS Challenger sailed from Portsmouth in 1872, a young assistant ship's steward, Joseph Matkin, was among the crew. Throughout the three-and-a-half-year voyage, Matkin maintained a journal from which he composed the many letters he sent home to his family in England. In his letters he commented on oceanographic operations, reported on shipboard events of special concern to the crew, and discussed at length the history, geography, and peoples of the many exotic and remote ports at which the ship called on its famous circumnavigation of the globe. The Challenger expedition established the foundations of oceanography and is second only to Darwin's voyage aboard the Beagle for its contributions to nineteenth-century science. The massive quantity of specimens and information acquired was written up in the fifty-volume series of Challenger Reports, and personal accounts were published by officers and scientists. No ocean voyage had ever been so well documented. Yet no account of the seaman's life "below decks" was known to exist until the early 1980s, when two substantial collections of Matkin's letters surfaced. The letters are unique in their perspective and fascinating for their depth and literacy. Matkin, the son of a printer, was well aware of the significance of the voyage and strove to present a learned account in a proper style. His letters convey a wealth of detail about shipboard logistics, the crew's attitudes toward scientific operations, and officer-scientist-crew relations. Unwittingly, Matkin also illuminates himself and the middle-class society of which he was a part. Matkin's letters, published here for the first time, bring freshness and immediacy to this great Victorian scientific enterprise. Philip F. Rehbock has edited and annotated the letters, providing a particularly readable work of travel literature for anyone interested in oceanography, voyaging, maritime social history, and naval affairs.

Journal of an Expedition Up the Niger and Tshadda Rivers Dec 26 2022 First published in 1855, this is an account of a British government-financed expedition to further European commercial interests in West Africa. It details the surveying of sites for future missions which has a profound effect on the history of Southern Nigeria.

The Mississippi Valley Historical Review Sep 11 2021 Includes articles and reviews covering all aspects of American history. Formerly the Mississippi Valley Historical Review,

Victorian Scrutinies Jan 03 2021 In the years covered by this volume high Victorian poetry reached it's prolific peak and stimulated a corresponding abundance of critical comment. As poets turned to new themes and new modes of presenting them, critics sought to redefine the function of poetry in their time and nowhere with greater immediacy and sense of the cultural issues at stake than in the periodicals. Two occasions when discussion was particularly lively - in relation to Tennyson's early poems and Arnold's 1853 Preface - are here used by Dr. Armstrong as focal points and with them in mind she has selected and annotated thirteen substantial reviews, principally devoted to the poetry of Tennyson, Browning, Arnold and Clough. Dr. Armstrong's own long Introduction serves equally as an indispensable preliminary guide to the fundamentals of Victorian criticism and as an authoritative summing-up of the debate on poetics conducted at large in the body of the book by the Victorians themselves. Detailed bibliographies for further reading are provided at the end of each main section.

The Powder River Expedition Journals of Colonel Richard Irving Dodge Feb 16 2022 Lt. Col. Richard Irving Dodge's journals are the fullest firsthand account available of Gen. George Crook's Powder River Expedition against the Sioux and Cheyenne Indians, which culminated in Col. Ranald S. Mackenzie's resounding destruction of Dull Knife's forces on November 25, 1876.

Baby Einstein: Jane's Animal Expedition Jul 09 2021 The adventurous Jane wants to learn about animals. So she takes off in her little red plane in search of them. But where do animals live:? The desert? The rain foreset? The ocean? Children will enjoy traveling around the world with Jane and meeting the many different creatures she discovers in each habitat.

Scott's Last Journey Nov 13 2021 There is growing world wide interest in the epic attempts to reach the South Pole by Shackleton and Scott, the latter's ending in tragedy. At the time these men were uncritically accepted as Englishmen in the heroic mould, though in past decades their legendary exploits have been subjected to more severe examination.

The Tigris Expedition Mar 29 2023 Describes the expedition that retraced the trade routes that may have existed between Mesopotamia, the Indus Valley, and Egypt a thousand years before Christ.

Hillat El-Arab Apr 18 2022 The two tombs examined here date to the beginning of that obscure period of Nubian history coinciding with the end of Egyptian colonization and the foundation of the independent Kingdom of Kush with its capital at Napata. This volume details the excavations at the Hillat el-Arab necropolis.

A Voyage Around the World with the Romanzov Exploring Expedition in the Years 1815-1818 in the Brig Rurik, Captain Otto Von Kotzebue Feb 28 2023

Antarctic Navigation Sep 23 2022 "ALL THE INGREDIENTS A READER COULD HOPE FOR: parallel historical and contemporary dramas, a contest between personal aspirations and the powers of nature, the testing of human relationships under extreme conditions, and a magnificent setting." --The Boston Globe "THIS NOVEL, LIKE SCOTT'S JOURNEY, IS BOLD IN CONCEPT . . . Morgan Lamont, the narrator of Elizabeth Arthur's novel, lies broken in the land of dreams. . . .Born on the fiftieth anniversary of Scott's death on his return trip from the South Pole in 1912, she begins her own sledding and man-hauling experiences at the age of five, when her Flexible Flyer slips away and she saves it in an act of youthful heroism. From then on, her life is drawn, almost magnetically, to the man and the last continent. . . .Arthur demonstrates great craftsmanship in planning and shaping her plot." --The New York Times Book Review "AS ELIZABETH ARTHUR CONVINCES US IN HER METICULOUSLY RESEARCHED, POWERFULLY DRAWN, AND DEEPLY FELT NOVEL, there are many beginnings and endings sealed within the polar ice . . . Antarctic Navigation is more than an adventure story recast in contemporary feminist terms. It is also a bumpy coming-of-age tale: an exploration of the unmapped terrain of the heart; a flirtation with the complexities of ecopolitics, pacifism, and New Age mysticism; a dip into history, memoir, and science, and Arthur's passionate love letter to the natural world." --Miami Herald "ONE ALMOST FEELS THAT THE AUTHOR WROTE IT UNDER THE INFLUENCE OF SCOTT, that she so breathed in the necessary geographical, scientific, emotional, and spiritual aspects of that dreadful journey as to transcend fiction and spin reality. . . .Soconvincing that for several chapters I was deluded into thinking she was telling her own story and that she had actually been to the pole." --Beryl Bainbridge New York Newsday "From the Trade Paperback edition.

The American Review of Reviews Aug 10 2021

Meriwether Lewis Jul 21 2022 Instead of focusing exclusively on the Lewis and Clark expedition, the authors concentrate on what Lewis was doing immediately before and after his journey through Western territory. They assess his role as a natural scientist and as governor of the Louisiana Territory.

The Forsters and the Botany of the Second Cook Expedition (1772-1775) Apr 06 2021

What Every Engineer Should Know about Reliability and Risk Analysis Mar 05 2021 "Examining reliability, availability, and risk analysis and reviewing in probability and statistics essential to understanding reliability methods, this outstanding volume describes day-to-day techniques used by practicing engineers -- discussing important reliability aspects of both components and complex systems. "

Military Review Oct 12 2021

Dreams of El Dorado Jan 27 2023 H.W. Brands tells the story of settling the American West, from fur trading in Oregon to the Texas Revolution; from the California gold rush to the Oklahoma land rush. He shows how the migrants' vivid dreams drove courage, perseverance, and outrageous acts of violence. The West was where riches rewarded a miner's persistence, a cattleman's courage, a railroad man's enterprise; but El Dorado was as elusive in the West as it ever was in the East.

The Terror Mar 17 2022 The "masterfully chilling" novel that inspired the hit AMC series (Entertainment Weekly). The men on board the HMS Terror — part of the 1845 Franklin Expedition, the first steam-powered vessels ever to search for the legendary Northwest Passage — are entering a second summer in the Arctic Circle without a thaw, stranded in a nightmarish landscape of encroaching ice and darkness. Endlessly cold, they struggle to survive with poisonous rations, a dwindling coal supply, and ships buckling in the grip of crushing ice. But their real enemy is even more terrifying. There is something out there in the frigid darkness: an unseen predator stalking their ship, a monstrous terror clawing to get in. “The best and most unusual historical novel I have read in years.” —Katherine A. Powers, Boston Globe

Naval Research Reviews Feb 22 2020

Icebound Jan 23 2020 In the bestselling tradition of Hampton Sides's In the Kingdom of Ice, a “gripping adventure tale” (The Boston Globe) recounting Dutch polar explorer William Barents’ three harrowing Arctic expeditions—the last of which resulted in a relentlessly challenging year-long fight for survival. The human story has always been one of perseverance—often against remarkable odds. The most astonishing survival tale of all might be that of 16th-century Dutch explorer William Barents and his crew of sixteen, who ventured farther north than any Europeans before and, on their third polar exploration, lost their ship off the frozen coast of Nova Zembla to unforgiving ice. The men would spend the next year fighting off ravenous polar bears, gnawing hunger, and endless winter. In Icebound, Andrea Pitzer masterfully combines a gripping tale of survival with a sweeping history of the great Age of Exploration—a time of hope, adventure, and seemingly unlimited geographic frontiers. At the story’s center is William Barents, one of the 16th century’s greatest navigators whose larger-than-life ambitions and obsessive quest to chart a path through the deepest, most remote regions of the Arctic ended in both tragedy and glory. Journalist Pitzer did extensive research, learning how to use four-hundred-year-old navigation equipment, setting out on three Arctic expeditions to retrace Barents’s steps, and visiting replicas of Barents’s ship and cabin. “A resonant meditation on human ingenuity, resilience, and hope” (The New Yorker), Pitzer’s reenactment of Barents’s ill-fated journey shows us how the human body can function at twenty degrees below, the history of mutiny, the art of celestial navigation, and the intricacies of building shelters. But above all, it gives us a firsthand glimpse into the true nature of courage.

John Devoy's Catalpa Expedition Jul 29 2020 Philip Fennell and Marie King, both descendants of a pardoned Fenian prisoner, tell the story from John Devoy's own records and from the ship's logbooks. John Devoy's Catalpa Expedition includes an introduction by Terry Golway and the personal diaries, letters, and reports from John Devoy and his men"--Jacket.

On the River with Lewis and Clark Oct 24 2022 On their remarkable journey across the North American continent, Meriwether Lewis and William Clark's "Corps of Discovery" traveled almost ten thousand miles, about nine thousand of them on rivers. With an expert's eye, Verne Huser tells us what it was like to mount and carry out such an expedition. 52 photographs, 4 line drawings, map.

American Monthly Review of Reviews Jun 27 2020

Into the Ice Sea Apr 30 2023 Synthesizes several expeditions by archeologists connected with Amsterdam's Rijksmuseum in the Novaya Zemlya archipelago between 1991 and 2000 and their historical parallels of four centuries.

[The Discoverie of the Large, Rich and Bewtiful Empyre of Guiana](#) Dec 22 2019 Neil Whitehead offers a scholarly edition of Sir Walter Raleigh's account of his expedition to South America in search of an indigenous 'empire' in the highlands of Guiana.

[Guidebook for Managing Silicon Chip Reliability](#) Jun 08 2021 Achieving cost-effective performance over time requires an organized, disciplined, and time-phased approach to product design, development, qualification, manufacture, and in-service management. Guidebook for Managing Silicon Chip Reliability examines the principal failure mechanisms associated with modern integrated circuits and describes common practices used to resolve them. This quick reference on semiconductor reliability addresses the key question: How will the understanding of failure mechanisms affect the future? Chapters discuss: failure sites, operational loads, and failure mechanism intrinsic device sensitivities electromigration hot carrier aging time dependent dielectric breakdown mechanical stress induced migration alpha particle sensitivity electrostatic discharge (ESD) and electrical overstress latch-up qualification screening guidelines for designing reliability Guidebook for Managing Silicon Chip Reliability focuses on device failure and causes throughout - providing a thorough framework on how to model the mechanism, test for defects, and avoid and manage damage. It will serve as an exceptional resource for electrical engineers as well as mechanical engineers working in the field of electronic packaging.

[The Farther Frontier](#) Dec 02 2020 Although the United States never became a participant in the imperialistic partition of Africa, a surprising number of Americans were involved with the so-called Dark Continent during the period when European penetration led to conquest and colonial rule. This book examines the activities of six Americans who played important roles in the West's relations with Africa in that era. The subjects discussed are Thomas Jefferson Bowen, who established the first American mission posts in Yorubaland and tried to penetrate the Muslim sphere beyond the Niger (1848-57); Paul Du Chaillu, explorer of Gabon and popular writer on Africa (1855-1903); Charles Chaille-Long, soldier-explorer who served the Egyptian government in the Sudan and in East Africa (1870-82); Henry Shelton Sanford, a diplomat and lobbyist who was a significant figure in negotiations leading to the colonial opening of the Congo (1877-90); John Hays Hammond, a mining engineer in South Africa (1893-96) who was a central participant in the Jameson Raid episode, which helped precipitate the Anglo-Boer War; and Carl Akeley, taxidermist-hunter-naturalist who led five collecting expeditions to Africa and produced highly influential museum exhibitions of African wildlife (1896-1926). These biographical studies help to fill out the picture of American ties to Africa presented in several surveys published in the last thirty-five years. While many of their countrymen found opportunities and tempting challenges in the developing frontier territories of their own country, the men covered here were drawn to a more exotic part of the world, where their experiences sometimes rivalled in excitement those of better-known European adventurers in Africa. Coming from dissimilar geographical and occupational backgrounds, these six Americans dealt with Africa in different ways: for the most part they were concerned with widely separated regions of the continent over almost a century. All their stories, however, contribute meaningfully toward our understanding of the history of America's connections with Africa during the nineteenth and early twentieth centuries. Based on extensive research in archival sources as well as on a critical evaluation of secondary materials, the case studies in this collection demonstrate in fascinating detail that such Americans were noteworthy actors in the evolution of Africa's confrontation with the outside world. One of the major themes to which the author gives his attention is the image of Africa that was created in the Western mind during the period involved and, indeed, long after. Several of the figures examined contributed in major ways to the peculiar representation of Africa and its people that governed Americans' perception of them for several generations. In this and in other respects Meyer's book provides insights that are relevant for both African and American history.

[The Edinburgh Review](#) Mar 25 2020

[Custer's Gold](#) Nov 01 2020 Accounts of military life of troops with General George Custer during his successful search for gold on Sioux lands in the Black Hills in Dakota territory.

[Footsteps on the Ice](#) Sep 30 2020 In 1933 Antarctica was essentially unexplored. Admiral Richard Byrd launched his Second Expedition to chart the southernmost continent, primarily relying on the muscle power of dog teams and their drivers who skied or ran beside the loaded sledges as they traveled. The life-threatening challenges of moving glaciers, invisible crevasses, and horrific storms compounded the difficulties of isolation, darkness, and the unimaginable cold that defined the men's lives. Stuart Paine was a dog driver, radio operator, and navigator on the fifty-six-man expedition, the bold and complex venture that is now famous for Byrd's dramatic rescue from Bolling Advance Weather Base located 115 miles inland. Paine's diaries represent the only published contemporary account written by a member of the Second Expedition. They reveal a behind-the-scenes look at the contentiousness surrounding the planned winter rescue of Byrd and offer unprecedented insights into the expedition's internal dynamics. Equally riveting is Paine's breathtaking narrative of the fall and summer field operations as the field parties depended on their own resources in the face of interminable uncertainty and peril. Undertaking the longest and most hazardous sledging journey of the expedition, Paine guided the first American party from the edge of the Ross Sea more than seven hundred miles up the Ross Ice Shelf and the massive Thorne (Scott) Glacier to approach the South Pole. He and two other men skied more than fourteen hundred miles in eighty-eight days to explore and map part of Antarctica for the first time. Footsteps on the Ice reveals the daily struggles, extreme personalities, and the matter-of-fact bravery of early explorers who are now fading into history. Detailing the men's frustrations, annoyances, and questioning of their leader, Paine's entries provide rare insight into how Byrd conducted his expeditions. Paine exposes the stresses of living under the snow in Little America during the four-month-long winter night, trapped in dim, crowded huts and black tunnels, while the men uneasily mulled over their leader's isolation at Advance Base. The fates of Paine's dogs, which provided some of his most difficult and rewarding experiences, are also described—his relationship with Jack, his lead dog, is an entrancing story in itself. Featuring previously unpublished photographs and illustrations, Footsteps on the Ice documents the period in Antarctic exploration that bridged the "heroic era" and the modern age of mechanized travel. Depicting almost incomprehensible mental and physical duress and unhesitating courage, Paine's tale is one of the most compelling stories in polar history, surpassing other accounts with its immediacy and adventure as it captures the majesty and mystery of the untouched Antarctic.

[Dark Waters \(the Expedition Trilogy, Book 1\)](#) Jun 20 2022 "This is a delightful and funny adventure ... It is also lonely, dangerous and frightening."—THE LONDON TIMES He survived a terrifying crocodile attack off Australia's Queensland coast, blood poisoning in the middle of the Pacific, malaria in Indonesia and China, and acute mountain sickness in the Himalayas. He was hit by a car and left for dead with two broken legs in Colorado, and incarcerated for espionage on the Sudan-Egypt border. The first in a thrilling adventure trilogy, Dark Waters charts one of the longest, most gruelling, yet uplifting and at times irreverently funny journeys in history, circling the world using just the power of the human body, hailed by the London Sunday Times as "The last great first for circumnavigation." But it was more than just a physical challenge. Prompted by what scientists have dubbed the "perfect storm" as the global population soars to 8.3 billion by 2030, adventurer Jason Lewis used The Expedition to reach out to thousands of schoolchildren, calling attention to our interconnectedness and shared responsibility of an inhabitable Earth for future generations. * * WINNER of the BENJAMIN FRANKLIN AWARD & ERIC HOFFER AWARD * * "Often funny and irreverent, always frank and authentic, Lewis's first volume of The Expedition series is also marked by the thrills of a first-rate adventure."—FOREWORD REVIEWS "Skating through Alabama with long hair, duct tape on the nipples, and women's culottes ... What were you thinking?"—JAY LENO, The Tonight Show "A riveting true-life adventure as inspiring as it is thrilling."—UTNE READER "An extraordinary expedition on an epic scale."—BEN FOGLE, television presenter and adventurer "Last great first for circumnavigation."—THE SUNDAY TIMES "Truly a tale for our time. You really smell, taste and breathe this journey in a way that is only possible by travelling more slowly."—ROYAL SCOTTISH GEOGRAPHICAL SOCIETY
