Transformational Imagemaking: Handmade Photography Since 1960 Sep 29 2020 This groundbreaking survey of significant work and ideas focuses on imagemakers who have pushed beyond the boundaries of photography as a window on our material world. Through interviews with more than 40 key artists, this book explores a diverse group of curious experimentalists who have propelled the medium's evolution by visualizing their subject matter as it originates from their mind's eye. Many favor the historical techniques commonly known as alternative photographic processes, but all these makers demonstrate that the real alternative is found in their mental approach and not in their use of physical methods. Within this context, photographer and photography historian Robert Hirsch outlines the varied approaches these artists have utilized to question conventional photographic practices, to convey internal realities, and to examine what constitutes photographic reality. Hirsch explores the half-century evolution of these concepts and methodologies and their popularity among contemporary imagemakers who are merging digital and analog processes to express what was thought to be photographically inexpressible. Composition Dec 13 2021 Difficult to grasp and harder still to achieve, composition is a chief concern of artists at every level. This clear and focused introduction exposes the compositional devices that underlie successful artworks. Its many examples reduce pictures to their basic formal elements, offering a concise treatment of an oft-neglected topic. Author Harry Sternberg, whose works appear in major museums throughout the United States, was a student and instructor at New York's prestigious Art Students League. He draws upon his extensive background as a teacher and professional to provide an approachable view of applying composition to graphic works. Novices and experienced artists alike will benefit from his well-illustrated explanations of handling such elements as the picture border, flat space, tensions, positive and negative space, geometric design, and volume, as well as the processes of

analyzing pictures and communication through design.

Picture Perfect Jul 08 2021 We say the camera doesn't lie, but we also know that pictures distort and deceive. In *Picture Perfect*, Kiku Adatto brilliantly examines the use and abuse of images today. Ranging from family albums to Facebook, political campaigns to popular movies, images of war to pictures of protest. Adatto reveals how the line between the person and the pose, the real and the fake, news and entertainment is increasingly blurred. New technologies make it easier than ever to capture, manipulate, and spread images. But even in the age of the Internet, we still seek authentic pictures and believe in the camera's promise to document, witness, and interpret our lives.

Film Production Technique Jan 02 2021 The text includes coverage of cutting-edge technologies as well as traditional techniques as it discusses lighting, cameras, editing, crew organization, and the production process. Cinematography: Theory and Practice Feb 27 2023 There's more to being a DP than holding a light meter! With this book as your guide, you are on your way to learning not only about the equipment and technology, but also about the concepts and thought processes that will enable you to shoot professionally, efficiently, and with artistic mastery. A leading book in the field, *Cinematography* has been translated into many languages and is a staple at the world's top film schools. Lavishly produced and illustrated, it covers the entire range of the profession. The book is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice, so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their Director of Photography. *Cinematography* presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations and diagrams to reveal the real world of film production. Recognizing that professionals know when to break the rules and when to abide by them, this book discusses many examples of fresh ideas and experiments in cinematography. Covering the most up-to-date information on the film/digital interface, new formats, the latest cranes and camera support and other equipment, it also illustrates the classic tried and true methods.

The Soul of the Camera Sep 10 2021 As both an art form and a universal language, the photograph has an extraordinary ability to connect and communicate with others. But with over one trillion photos taken each year, why do so few of them truly connect? Why do so few of them grab our emotions or our imaginations? It is not because the images lack focus or proper exposure; with advances in technology, the camera does that so well these days. Photographer David duChemin believes the majority of our images fall short because they lack soul. And without soul, the images have no ability to resonate with others. They simply cannot connect with the viewer, or even—if we're being truthful—with ourselves.

In *The Soul of the Camera: The Photographer's Place in Picture-Making*, David explores what it means to make better photographs. Illustrated with a collection of beautiful black-and-white images, the book's essays address topics such as craft, mastery, vision, audience, discipline, story, and authenticity. *The Soul of the Camera* is a personal and deeply pragmatic book that quietly yet forcefully challenges the idea that our cameras, lenses, and settings are anything more than dumb and mute tools. It is the photographer, not the camera, that can and must learn

to make better photographs—photographs that convey our vision, connect with others, and, at their core, contain our humanity. *The Soul of the Camera* helps us do that.

Making Images Move Aug 21 2022 Making Images Move reveals a new history of cinema by uncovering its connections to other media and art forms. In this richly illustrated volume, Gregory Zinman explores how moving-image artists who worked in experimental film pushed the medium toward abstraction through a number of unconventional filmmaking practices, including painting and scratching directly on the film strip; deteriorating film with water, dirt, and bleach; and applying materials such as paper and glue. This book provides a comprehensive history of this tradition of “handmade cinema” from the early twentieth century to the present, opening up new conversations about the production, meaning, and significance of the moving image. From painted film to kinetic art, and from psychedelic light shows to video synthesis, Gregory Zinman recovers the range of forms, tools, and intentions that make up cinema’s shadow history, deepening awareness of the intersection of art and media in the twentieth century, and anticipating what is to come.

Making Images with Mathematics Jan 22 2020 This textbook teaches readers how to turn geometry into an image on a computer screen. This exciting journey begins in the schools of the ancient Greek philosophers, and describes the major events that changed people’s perception of geometry. The readers will learn how to see geometry and colors beyond simple mathematical formulas and how to represent geometric shapes, transformations and motions by digital sampling of various mathematical functions. Special multiplatform visualization software developed by the author will allow readers to explore the exciting world of visual immersive mathematics, and the book software repository will provide a starting point for their own sophisticated visualization applications. Making Images with Mathematics serves as a self-contained text for a one-semester computer graphics and visualization course for computer science and engineering students, as well as a reference manual for researchers and developers.

Image-Making-India Jan 26 2023 Image-Making-India explores the evolving meaning of images in a digital landscape from the vantage point of contemporary India. Building upon long-term ethnographic research among image-makers in Delhi, Mumbai and other Indian cities, the author interrogates the dialogue between visual culture, technology and changing notions of political participation. The book explores selected artistic experiences in documentary and fiction film, photography, contemporary art and digital curation that have in common a desire to engage with images as tools for social intervention. These experiences reveal images’ capacity not only to narrate and represent but also to perform, do and affect. Particular attention is devoted to the ‘digital’, a critical landscape that offers an opportunity to re-examine the significance of images

and visual culture in a rapidly changing India. This volume will be of particular interest to scholars of visual and digital anthropology and cultures as well as South Asian studies.

Photography & Psychoanalysis May 26 2020 This text is about the histories of photography and psychoanalysis. It describes how they came together in the 20th century to revolutionize political propaganda and sales messages. It references the works of several 20th Century and contemporary photographers including: Edward Steichen, Brian Duffy, Helmut Newton, Henri Cartier-Bresson, Nan Goldin, Gregory Crewdson, Larry Clark, and Wang Qingsong. It includes a chapter summarizing and critiquing many of the thoughts of the philosopher and activist Susan Sontag, as well as being completely up-to-date with a chapter about photographers Cindy Sherman and Miru Kim. The book demonstrates how images may be understood, and interpreted, using the ideas of Freud, Jung and Lacan. This book helps you understand the psychological impact of images. You are introduced to various characters who influenced the development of both photography and psychoanalysis during the 19th and 20th centuries, and you are helped to appreciate the impact they continue to have today. Psychological and photographic concepts are added into the narrative until it becomes possible to look at examples of contemporary advertising images and campaigns using appropriate tools.

Image in the Making Apr 05 2021 Human beings have always made images, and to do so they have developed and refined an enormous range of artistic tools and materials. With the development of digital technology, the ways of making images - whether they are still or moving, 2D or 3D - have evolved at an unprecedented rate. At every stage of image making, artists now face a choice between using analog and using digital tools. Yet a digital image need not look digital; and likewise, a hand-made image or traditional photograph need not look analog. If we do not see the artist's choice between the analog and the digital, what difference can this choice make for our appreciation of images in the digital age? *Image in the Making* answers this question by accounting for the fundamental distinction between the analog and the digital; by explicating the technological realization of this distinction in image-making practice; and by exploring the creative possibilities that are distinctive of the digital. Katherine Thomson-Jones makes the case for a new kind of appreciation in the digital age. In appreciating the images involved in every digital art form - from digital video installation to net art to digital cinema - there is a basic truth that we cannot ignore: The nature and technology of the digital expands both what an image can be as an image and what an image can be for us as human beings.

Type, Image, Message Feb 03 2021 Working with type and image and the integration of these two elements to create persuasive and effective design pieces are the foundations of good graphic design. Yet, very little practical information exists for these tasks. This book changes all it. It gives designers the practical know-how to combine type and image for dynamic effect as well as to use them in contrast to create tension and meaning in design. Creating strong layouts is the most important as well as the most challenging of any project. This book inspires through excellence by exhibiting great design work then deconstructing the processes in simple visual terms. *Type, Image, Message: Merging Pictures and Ideas* looks at this respected art form while providing practical information that can be used by any designer wishing to hone the skills needed to merge type with images in an inspired manner.

Image and Image Making Nov 12 2021 I think that the subject "Image and Image Making" is urgent now as presently laws of the market dictate the rules. It is not enough to make goods – it is not less important to sell it.

The Elements of Photography Jul 20 2022 Photography is a complex craft. Some excel at the technical side of image-making, focusing perfectly on the subject, releasing the shutter at just the right moment and making exposures with the precise amount of light. Others are artists and storytellers, capturing a fleeting moment in time which inspires a viewer to gaze upon an image and ponder its meaning. The best photographers are masters of both. In this highly visual, informative new book, Angela Faris Belt discusses the four crucial elements of photography that are essential for successful technical and conceptual image-making: .the photographic frame and its borders .quality of focus as determined by the aperture or lens .shutter speeds and their effects in relation to time and motion .the physical media used to create the aggregate image Step-by-step guidance including informative screen shots, traditional darkroom and Photoshop techniques, suggested exercises, and before and after images help both film and digital photographers improve their skills, learn new techniques, and better understand their craft. More than 300 stunning, full color images and portfolios featuring the work of over 40 prestigious artists provide visual inspiration as well as a gorgeous collection of artwork for photography enthusiasts.

Photographically Speaking Mar 04 2021 When looking at a photograph, too often a conversation starts—and, unfortunately, ends—with a statement such as, "I like it." The logical next question, "Why?," often goes unasked and unanswered. As photographers, we frequently have difficulty speaking about images because, frankly, we don't know how to think about them. And if we don't know how to think about a photograph and its "visual language"—how an image is constructed, how it works, and why it works—then, when we're behind the camera, are we really making images that best communicate our vision, our original intent? Vision—crucial as it

is—is not the ultimate goal of photography; expression is the goal. And to best express ourselves, it is necessary to learn and use the grammar and vocabulary of the visual language. Photographically Speaking is about learning photography's visual language to better speak to why and how a photograph succeeds, and in turn to consciously use that visual language in the creation of our own photographs, making us stronger photographers who are able to fully express and communicate our vision. By breaking up the visual language into two main components—"elements" make up its vocabulary, and "decisions" are its grammar—David duChemin transforms what has traditionally been esoteric and difficult subject matter into an accessible and practical discussion that photographers can immediately use to improve their craft. Elements are the "words" of the image, what we place within the frame—lines, curves, light, color, contrast. Decisions are the choices we make in assembling those elements to best express and communicate our vision—the use of framing, perspective, point of view, balance, focus, exposure. All content within the frame has meaning, and duChemin establishes that photographers must consciously and deliberately choose the elements that go within their frame and make the decisions about how that frame is constructed and presented. In the second half of the book, duChemin applies this methodology to his own craft, as he explores the visual language in 20 of his own images, discussing how the intentional choices of elements and decisions that went into their creation contribute to their success.

Images in the making May 18 2022 This book offers an analysis of archaeological imagery based on new materialist approaches. Reassessing the representational paradigm of archaeological image analysis, it argues for the importance of ontology, redefining images as material processes or events that draw together differing aspects of the world. The book is divided into three sections: 'Emergent images', which focuses on practices of making; 'Images as process', which examines the making and role of images in prehistoric societies; and 'Unfolding images', which focuses on how images change as they are made and circulated. Featuring contributions from archaeologists, Egyptologists, anthropologists and artists, it highlights the multiple role of images in prehistoric and historic societies, while demonstrating that scholars need to recognise their dynamic and changeable character.

Ekphrastic Image-making in Early Modern Europe, 1500–1700 Oct 11 2021 This volume examines how and why many early modern pictures operate in an ekphrastic mode.

The Image Maker Study Guide Jul 28 2020

Cinematography: Theory and Practice Apr 29 2023 The world of cinematography has changed more in the last few years than it has since it has in 1929, when sound recording was introduced. New technology, new tools and new methods have revolutionized the art and craft of telling stories visually. While some aspects of visual language, lighting and color are eternal, shooting methods, workflow and cameras have changed radically. Even experienced film artists have a need to update and review new methods and equipment. These changes affect not only the director of photography but also the director, the camera assistants, gaffers, and digital imaging technicians. Cinematography: Theory and Practice covers both the artistry and craftsmanship of cinematography and visual storytelling. Few art forms are as tied to their tools and technology as is cinematography. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from author and filmmaker Blain Brown. Whether you are a student of filmmaking, just breaking into the business, currently working in the industry and looking to move up to the next level, or an experienced professional who wants to update their knowledge of tools and techniques, this book provides both a basic introduction to these issues as well as more advanced and in-depth coverage of the subject. The companion website features additional material, including lighting demonstrations, basic methods of lighting, using diffusion and other topics. Topics Include: Visual language Visual storytelling Continuity and coverage Cameras and digital sensors Exposure techniques for film and video Color in-depth Understanding digital images Waveform monitors, vectorscopes, and test charts Using linear, gamma, and log encoded video Image control and grading on the set The tools and basics of film lighting ASC-CDL, ACES and other new methods Optics and focus Camera movement Set operations Green screen, high speed and other topics

Image, Perception, and the Making of U.S.-China Relations Aug 09 2021 Image, Perception, and the Making of U.S.-China Relations examines major events in the history of the relationship between the U.S. and China to show the development and effects of national images and perceptions. These essays expose the effects of ideology as represented through foreign policy and the actions of leaders, as well as the role of the media and governments in shaping public opinion and attitudes. They show the evolution of the influential forces from the nineteenth century through the twentieth century. In each country, a small group of people has always controlled these forces by manipulating the power of the media and governments. The nature of this situation changed national perceptions as power often moved from one small group to another. As a result of manipulating the images and perceptions of each country, these biased and untrue views have inevitably led to conflict between the two countries.
