1561.88 When Archaeology Meets Communities examines the history of nineteenth-century Sicilian archaeology through the archival documentation for the excavations at Tindari, Lipari and nearby minor sites in the Messina province, from Italy's Unification to the end of the First World War (1861-1918). L'intreccio tra la migrazione in Italia e la pratica della scrittura letteraria in lingua italiana accomuna le donne le cui storie, raccolte in lunghe interviste biografiche, sono presentate e analizzate in questo volume. La migrazione può configurarsi come esperienza di sradicamento e di solitudine, anche in ragione delle forme di esclusione attive nella società d'approdo. Ma la pratica della scrittura, nella nuova lingua, può essere strumento attraverso il quale costruire nuove appartenenze e sentire di poter avere, ancora, «un posto nel mondo», come afferma una delle donne intervistate. Le biografie raccolte mettono in crisi l'immaginario egemonico sulle "donne migranti", popolato da stereotipi in cui si intersecano assunti razzisti, sessisti ed eurocentrici. L'esperienza della scrittura in migrazione

viene interpretata e discussa come una pratica di soggettivazione, una pratica cioè attraverso la quale le donne migranti cessano di essere soggetti narrati e si rendono soggetti narranti, potendo così contribuire a rinominare e ri-significare i processi di costruzione e reificazione dell'alterità. «Questo è un libro in cui la sociologia è vivente. Promuove e articola la percezione di uno scarto fra le esperienze di chi questo mondo lo abita e i modi in cui le narrazioni più correnti le deformano. Promuove e articola curiosità e critica. È un libro molto bello. Io spero che lo leggano in tanti».

Dalla Prefazione di Paolo Jedlowski This edited volume sets the groundwork for a dialogue between transformative learning and continental theories of Bildung in adulthood. Both theoretical frameworks bring meaning to the complex learning process of individuals as they develop a more critical worldview. In this volume, a variety of authors from different countries and theoretical backgrounds offer new understandings about Bildung and transformative learning through discussion of theoretical analyses, educational practices, and empirical research. As a result, readers gain greater insight into these theories and related implications for teaching for change. From the various chapters an exciting relationship between both theories begins to emerge and provides impetus for greater discussion and further research about two important theories of change in the field of adult education. /div Il volume 32.1 è suddiviso in due parti. La prima comprende gli articoli proposti annualmente alla rivista da studiosi italiani e stranieri che illustrano ricerche archeologiche interdisciplinari in cui l'uso delle tecnologie informatiche risulta determinante per l'acquisizione, l'elaborazione e l'interpretazione dei dati. Tecniche di analisi statistica, banche dati, GIS e analisi spaziali, tecniche di rilievo tridimensionale e ricostruzioni virtuali, sistemi multimediali, contribuiscono a documentare le testimonianze del passato e a diffondere i risultati della ricerca scientifica. La seconda parte del volume contiene un inserto speciale curato da Angela Bellia e dedicato a una tematica innovativa, l'archeomusicologia, un campo di ricerca multidisciplinare che adotta i metodi dell'archeologia per lo studio della musica e della vita musicale nel mondo antico. Gli articoli s'incentrano sul ruolo delle tecnologie digitali basate sulla modellazione 3D e sulla simulazione del suono per ampliare le conoscenze sugli strumenti musicali dell'antichità e sul prezioso, ma estremamente labile, patrimonio sonoro. Chiude il volume la sezione dedicata alle Note e recensioni. The development of technologies, education, and economy play an important

role in modern society. Digital literacy is important for personal development and for the economic growth of society. Technological learning provides students with specific knowledge and capabilities for using new technologies in their everyday lives and in their careers. Examining the Roles of Teachers and Students in Mastering New Technologies is a critical scholarly resource that examines computer literacy knowledge levels in students and the perception of computer use in the classroom from various teacher perspectives. Featuring a wide range of topics such as higher education, special education, and blended learning, this book is ideal for teachers, instructional designers, curriculum developers, academicians, policymakers, administrators, researchers, and students. "Collection of incunabula and early medical prints in the library of the Surgeon-general's office, U.S. Army": Ser. 3, v. 10, p. 1415-1436. "This book is designed to be a platform for the most significant educational achievements by teachers, school administrators, and local associations that have worked together in public institutions that range from primary school to the university level"--Provided by publisher. This volume brings together major scholars in medieval Franciscan history, hagiography and art to commemorate Dr Rosalind B. Brooke's (1925-2014) life and scholarly achievement, especially in the study of St Francis of Assisi and his followers. Incorporating contingency into our fundamental thinking about architecture contradicts the way we theorize, practice, and historicize the field. Accidents happen, yet architects rarely let chance play a role in their visions. How contingency play a role in architectural design and thinking? How designers incorporate change in their practice? The forward-facing nature of contingency scholarship, if we give it a name, may embed possible worlds that are more just, more compassionate, and more aware of the inequalities that accompany the uneven distribution of the most vital resource i our times: space. This issue began with the aim of exploring contingency thinking, and is completed from within contingent times, when nothing seems certain and contingency is less a lens than the air we breathe.
