Michael Pollan, the bestselling author of *The Omnivore's Dilemma*, *Food Rules*, *How to Change Your Mind*, and *This is Your Mind on Plants* explores the previously uncharted territory of his own kitchen in *Cooked*. "Having described what's wrong with American food in his best-selling *The Omnivore's Dilemma* (2006), New York Times contributor Pollan delivers a more optimistic but equally fascinating account of how to do it right. . . . A delightful chronicle of the education of a cook who steps back frequently to extol the scientific and philosophical basis of this deeply satisfying human activity." —Kirkus (starred review) *Cooked* is now a Netflix docuseries based on the book that focuses on the four kinds of "transformations" that occur in cooking. Directed by Oscar-winning filmmaker Alex Gibney and starring Michael Pollan, *Cooked* teases out the links between science, culture

and the flavors we love. In *Cooked*, Pollan discovers the enduring power of the four classical elements—fire, water, air, and earth—to transform the stuff of nature into delicious things to eat and drink. Apprenticing himself to a succession of culinary masters, Pollan learns how to grill with fire, cook with liquid, bake bread, and ferment everything from cheese to beer. Each section of *Cooked* tracks Pollan's effort to master a single classic recipe using one of the four elements. A North Carolina barbecue pit master tutors him in the primal magic of fire; a Chez Panisse-trained cook schools him in the art of braising; a celebrated baker teaches him how air transforms grain and water into a fragrant loaf of bread; and finally, several mad-genius "fermentos" (a tribe that includes brewers, cheese makers, and all kinds of picklers) reveal how fungi and bacteria can perform the most amazing alchemies of all. The reader learns alongside Pollan, but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of social and ecological relationships. Cooking, above all, connects us. The effects of not cooking are similarly far reaching. Relying upon corporations to process our food means we consume large quantities of fat, sugar, and salt; disrupt an essential link to the natural world; and weaken our relationships with family and friends. In fact, *Cooked* argues, taking back control of cooking may be the single most important step anyone can take to help make

the American food system healthier and more sustainable. Reclaiming cooking as an act of enjoyment and self-reliance, learning to perform the magic of these everyday transformations, opens the door to a more nourishing life. Why Myers? David Myers has become the world's best-selling introductory psychology

author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact.

Why Modules? This modules-based version of Myers' best-selling, full-length text, *Psychology* (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire *Sensation and Perception* chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the

other senses in whatever order they choose. Watch our new videos from David Myers here, including our animation on **THE TESTING EFFECT** narrated by David Myers.
