Consult this handy reference work when you need accurate, up to date information on subjects ranging from the effects of work on children's education to the use of child labor in Eastern Europe. * A-Z entries are also arranged by category * Numerous citations of contemporary books and studies This book explores foreign policy developments in post-colonial Africa. A continental foreign policy is a tenuous proposition, yet new African states emerged out of armed resistance and advocacy from regional allies such as the Bandung Conference and the League of Arab States. Ghana was the first Sub-Saharan African country to gain independence in 1957. Fourteen more countries gained independence in 1960 alone, and by May 1963, when the Organisation of African Unity (OAU) was formed, 30 countries were independent. An early OAU committee was the African Liberation Committee (ALC), tasked to work in the Frontline States (FLS) to support independence in Southern Africa. Pan-Africanists, in alliance with Brazzaville, Casablanca and Monrovia groups, approached continental unity differently, and regionalism continued to be a major feature. Africa's challenges were often magnified by the capitalist-democratic versus communist-socialist bloc rivalry, but through Africa's use and leveraging of IGOs - the UN, UNDP, UNECA, GATT, NIEO and others - to advance development, the formation of the African Economic Community, OAU's evolution into the AU and other alliances belied collective actions, even as Africa implemented decisions that required cooperation: *uti possidetis* (maintaining colonial borders), containing secession, intra- and inter-state conflicts, rebellions and building RECs and a united

Africa as envisioned by Pan Africanists worked better collectively. This Canadian report looks at the results of a study into the complex relationship between literacy education and employment outcomes. Literacy education has always been concerned with helping develop the skills and knowledge they need in order to gain independence. We know the education plays a key role in employability and that literacy programming provides an important stepping stone to further education and employment. However, our research has also shown that a number of personal and systemic barriers often get in the way of a person's ability to find and keep a job. By examining student's life histories over time, this project is beginning to identify some of the more subtle and often complex connections between literacy and poverty, abuse, poor health etc and how these issues can affect a person's ability to become fully employed. We are also learning about some of the supports, programs and policies that best enable adult learners to achieve self-sufficiency. Table of contents: * Introduction * Highlights from Phase I: LWW Preliminary Study * LWW (Phase II): Research goals and methodology * The research context and students * Life histories * Adulthood * Summary of findings. Myanmar Country Study Guide - Strategic Information and Developments Volume 1 Strategic Information and Developments "The purpose of this workshop is to increase your perception of how children speak to us and we speak to them through the language of behavior. Discussion will focus on causes and sources of misbehavior, expression of feelings and emotions and degrees of disciplinary action and intervention. Case studies will be utilized enabling you to make observations of motivation, development and relationships with peers and adults. Emphasis will be placed on aiding a child to gain self-control, responsibility and independence through reasonable guidelines."--Handout number one. This volume explores the varied outcomes that self-determination movements around the world have achieved, and in particular seeks to understand what factors promote better

outcomes and what factors promote worse ones, and evaluates the quality of societies after independence. The story of Mahatma Gandhi is the story of modern India. Rejecting the violence and materialism of modern society, this spiritual leader advocated peaceful methods to achieve social reform, and it was largely through his efforts that India gained independence from British rule in 1947. This study tells his story and shows how his influence has now extended far beyond the barriers of nation. This book is written for trainees in all subjects related to health. Research-orientated questions are incorporated into the majority of Royal College membership examinations; for example, in the OSCE station a research study or paper has to be criticised. Because of the nature of the editors' posts and their contacts there is naturally an emphasis on the specialist registrar trainee in obstetrics and gynaecology and many of the writers and thus the examples in the text are obstetric and gynaecological, however physicians, surgeons, midwives and nurses could readily use the book. Independence Versus Conformity is a look back at the research of Solomon E Asch. At the time his work would be a successful attempt at supporting the earliest research pertaining to social psychology, the scientific study of how behavior can be affected by social surroundings. This research as it would turn would support the notion individual opinion could be easily altered the result of the opinions of one's social surrounding. Asch would take more of a hands-on approach within his demonstration as compared to the work of Bernheim, as an example. Asch's 1955 study would act as a middle ground, bridging the earliest studies of the beginning of the 20th century to the present day findings of a more modern social psychology. The research in creation of this report would act as a follow-up to the 1955 study, in a creative means of putting the author himself in an evaluatory position within the actual experiment. This volume explores how Irish children were 'constructed' by various actors including the state, youth organisations, authors and publishers in the period before

and after Ireland gained independence in 1922. It examines the broad variety of ways in which the Irish child was constructed through social and cultural activities like education, sport, youth organizations, and cultural production such as literature, toys, and clothes, covering themes ranging from gender, religion and social class, to the broader politics of identity, citizenship, and nation-building. A variety of ideals and ideologies, some of them conflicting, competed to inform how children were constructed by the adults who looked on them as embodying the future of the nation. Contributors ask fundamental questions about how children were constructed as part of the idealisation of the state before its formation, and the consolidation of the state after its foundation. Eritrea, the newest nation-state in Africa, gained independence from the Ethiopian state after a prolonged and bitter conflict. This book is the first comprehensive analysis of the country's political history over the past three decades. It examines the origins of Eritrean nationalism, and charts the development of its various nationalist movements, assessing the programs and capabilities of the parties contending for power. It also analyzes the regional and international context within which the battles for independence were fought. A Texas historian presents a vividly detailed account of the 1835-36 battle for independence, shining new light on the experiences of Tejano rebels. In the 1820s and '30s, thousands of settlers from the United States migrated to Mexican Texas, lured by Mexico's promise of freedom. But when President Antonio Lopez de Santa Anna came to power, he discarded the constitution and established a new centralized government. In 1835 and '36, Mexican-born Tejanos and Anglo-born Texans fought side by side to defend their rights against this authoritarian power grab. After Santa Anna silenced dissent across Mexico, Texas emerged as the lone province to gain independence. Offering a unique study of the role the Mexican-born revolutionaries played in Texas's battle for independence, this account examines Mexico from the

fifteenth century through the birth of the sovereign nation of Texas in 1836. Drawing heavily on first-person accounts, this detailed history sheds light on the stories and experiences of Tejanos and Texans who endured the fight for liberty. Enhanced by maps and illustrations handcrafted by the author, this volume contributes an important perspective to the ongoing scholarship and debate surrounding the Alamo generation of the 1830s. Adam and His Freedom Machine was inspired by a good friend of mine (Adam R. S.). While doing research for this book, his excitement captivated me. When he expressed his first bicycle experience with me, it was just what I was looking for. Excitement! As children learn to ride a bicycle, they also learn perseverance and determination. They gain independence and freedom. Some may also learn the meaning of 'when you fall it might hurt, but keep trying. You'll get it.' Perseverance! In December 1999, prior to the forming of a Stockholm Centre for Commercial Law, an international symposium entitled Central Bank Independence was held at the Department of Law at Stockholm University in co-operation with the Swedish Central Bank (The Riksbank) and Queen Mary and Westfield College, London University. The participants were principally political, economic and legal specialists in the field, all with considerable international experience. This led to the topic being examined in detail from many different perspectives. This publication includes contributions by the participants and contains many important facts for those readers who wish to study and understand the different consequences of the yielding of control over financial policymaking by the traditional political organisations to a body of experts. For readers in some countries, who realise that the subject will revolutionise traditional Constitutional and Administrative Law, the topic and therefore this publication, cannot be ignored. Wars rarely turn out as expected. This book shows how Britain entered a conflict that it believed could not be lost. The American Patriots were similarly optimistic about their martial prospects. Although they eventually secured independence, it was only with the assistance of France and indirectly Spain, who diverted British resources from the conflict in America, allowing France eventually to deliver a knockout blow at Yorktown. This extensive yet accessible exploration into the War of American Independence provides a clear analysis of why this complex conflict occurred and why it ended as it did, revealing the fragile nature of the American Patriot cause. An essential guide for any history student, including those specializing in war/peace studies and the study of international relations, as well the general reader with an interest in the study of war. During the long period when the world was divided between East and West and the Cold War threatened to turn hot with devastating consequences, the Non-Aligned Movement was one of the few institutions that consistently sought other outcomes not in its own interest, but that of all humanity. Consisting of over 100 states that are free of any formal alliances with any major power bloc, the Non-Aligned Movement provides aid to those countries striving to gain independence, eliminate poverty, and develop their economy. Just what the Non-Aligned Movement and Third World sought--and at times achieved--is set forth in this unique reference work, with its

over 200 cross-referenced dictionary entries on important persons, organizations, and conferences, as well as the key issues and concepts. Entries are supported by an extensive chronology, a list of acronyms, an introduction to the movement, and a bibliography for further research. SuperSummary, a modern alternative to SparkNotes and CliffsNotes, offers high-quality study guides for challenging works of literature. This 20-page guide for "The Declaration of Independence" by Thomas Jefferson includes detailed chapter summaries and analysis, as well as several more in-depth sections of expert-written literary analysis. Featured content includes commentary on major characters, 15 important quotes, essay topics, and key themes like The Social Contract and the Legitimacy of a Government, and Freedom from Tyranny. Independent study programs aren't for the "best" students; they are populated by students at their best. Student disengagement from school is a trending concern, and many schools have turned their attention to independent study programs as a way to nurture student motivation and creativity. But where to begin? Geraldine Woods offers a practical, step-by-step guide based on her experience designing and directing the much-admired independent study program at the Horace Mann School. Under the supervision of teachers, students embark on a remarkable variety of projects and become teachers themselves, conducting seminars with their peers along the way to preparing their final product—which could as easily be an interactive website or musical composition as a research paper. Woods' book details the nuts and bolts of the approach and shows how to customize it for a variety of age groups, budgets, and curricular requirements. It is a gift to all educators—including homeschooling parents—who want to give students the freedom to pursue their interests. Carl Lotus Becker (1873-1945) was an American historian. He was born in Waterloo, Black Hawk County, Iowa. He studied at the University of Wisconsin. Frederick Jackson Turner was his doctoral advisor there. Becker

got his Ph. D. in 1907. He is best known for *The Heavenly City of the Eighteenth-Century Philosophers* (1932), four lectures on The Enlightenment delivered at Yale University. His assertion that philosophes in the Age of Reason , relied far more upon Christian assumptions than they cared to admit has been influential, but has also been much attacked. He also wrote *The Beginnings of the American People* (1915), *The Eve of the Revolution: A Chronicle of the Breach with England* (1918), and *The Declaration of Independence* (1922).

A rising median age at which PhD's receive their first research grant from the National Institutes of Health (NIH) is among the factors forcing academic biomedical researchers to spend longer periods of time before they can set their own research directions and establish there independence. The fear that promising prospective scientists will choose other career paths has raised concerns about the future of biomedical research in the United States. At the request of NIH, the National Academies conducted a study on ways to address these issues. The report recommends that NIH make fostering independence of biomedical researchers an agencywide goal, and that it take steps to provide postdocs and early-career investigators with more financial support for their own research, improve postdoc mentoring and establish programs for new investigators and staff scientists among other mechanisms. It was only after the end of World War II that most of the South East Asian countries gained their independence from western colonial rulers. After centuries under foreign dominion, these countries have to go through difficult processes of transformation to protect their new found sovereignty and territorial integrity especially against the threat of communism during the Cold War. More significantly, the peoples of the new independent states found greater incentives and opportunities to identify themselves with ethnic groups along common decent, shared experiences and cultural factors. This social dynamics led to the emergence of tensions and conflicts not only between ethnic groups and the state, but also between ethnic groups and other groups of society. The causes of such conflicts are complex and varied, such as discrimination, repression, political disenfranchisement and the

Scholarly Research paper from the year 2014 in the subject History - Asia, National University of Malaysia, course: History, language: English, abstract: This study will analyze the historical development of Malay nationalism against Western powers, particularly the British in Malaya before independence in 1957. The method used in this study is based on the method of observation of the resources available at the library and the National Archives of Malaysia. This study will begin with the dismantling of the prior history of Malaya's early economic development. The arrival of the Western powers, namely the Portuguese, Dutch and British to Malaya was due to the economic importance of Malaya, which is also known as the Land of Gold

and Gold Peninsular by foreign races. Malaya was colonized for more than 400 years since the Portuguese colonization in 1511. When the British controlled Malaya, the inclusion of their pro-Western idea has created conflict with the Malay community. This study will focus on the historiography of the Malay community to look at the historical development of Malay nationalism and the parties involved in the resistance against the British. After the country gained independence, the implementation of the Look East Policy by Tun Dr. Mahathir Mohamad in 1982 is seen to end the continuous conflict between pro-Western idea that been brought by the colonists and the Malay nationalism spirit, with the Japanese model representing the East model has replaced the long-standing Western models that dominate the lives of the Malays as far back as the Portuguese domination of Malacca in 1511.

Publisher Simone Janson is also a bestselling author as well as one of the 10 most important German bloggers according to the Blogger-Relevance-Index, furthermore she was a columnist and author of renowned media such as WELT, Wirtschaftswoche or ZEIT - more about her in Wikipedia. Decades of research have demonstrated that the parent-child dyad and the environment of the family"which includes all primary caregivers"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly

growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. This guide to study skills is essential reading for students going to university for the first time. Whether it is read before or alongside a study skills module, this text will enable students to gain necessary skills and confidence. In this absorbing collection Eric Miller draws on the experience of three decades as organizational consultant to various sorts of institutions, employing approaches drawn from psychoanalysis, systems theory and the group relations movement. He has worked and is esteemed throughout the world. Since all his work has been conducted in the midst of ongoing and temporary institutions, it is all 'action research'. Among the sites analysed in these papers are an airline; hospitals for incurables, the elderly, the mentally ill; a diocese; a prison; a diplomatic mission; manufacturing companies and rural sites. Throughout his case studies he addresses issues of dependence, independence and counterdependence. In all of the settings his

aim has been to help people to gain greater influence over their environments. In the concluding chapters he lifts his eyes from small groups and society in microcosm to address society as an intelligible field of study. Throughout the book he focuses constantly on values and concepts in action. Excerpt from Vermont: A Study of Independence It does not seem probable that the warlike nation that conquered all tribes with which it came in contact, having once gained complete possession, should relinquish it. A more reasonable conclusion is, that the country lying east of Lake Champlain was a debatable ground of these aboriginal tribes in the remote past, as it was more recently of civilized nations and states. This study attempts to illuminate an injustice to the Cherokee Nation through denial of First Amendment rights in newspapers and communities. Through case studies and in-depth interviews it examines the avenues by which other Native American newspapers can gain independence and publish free from censorship. The study focuses on The Cherokee Phoenix and Indian Advocate and The Cherokee Observer. Studying The Cherokee Phoenix and Indian Advocate allowed for the examination of the Cherokee tribe's official newspaper before and after the Independent Press Act of 2000, and how the landmark legislation has changed the newspaper and its relationship to the tribal government. The establishment of The Cherokee Observer shows why some

members of the Cherokee tribe felt that an alternative newspaper was necessary before and after the legislation was passed, and as they continue to feel the need to publish even five years after the Cherokee press was freed.
